

Learning Objectives

At the end of this course the participant should be able to:

1. Discuss recent updates on evidence-based psychopharmacological treatments for **internalizing disorders**, including mood disorders, anxiety disorders, and obsessive-compulsive disorder in children and adolescents.
2. Discuss recent updates on evidence-based psychopharmacological treatments for **externalizing disorders** including attention-deficit/hyperactivity disorder and other disruptive behavior disorders in children and adolescents.
3. Discuss recent updates on evidence-based psychopharmacological treatments for autism spectrum disorder, tic disorders, and substance use disorders in children and adolescents.
4. Consider use of and **apply these evidence-based psychopharmacological** treatments as components of multimodal treatment in clinical practice.
5. Identify **new or novel psychopharmacological** approaches currently under investigation which may be potential new treatments.

Content Overview

Module 1: Internalizing Disorders

Topics: Anxiety, Tic's and Tourette's Syndrome, Depression, Pediatric Bipolar Disorder, and Disruptive Mood Dysregulation Disorder

Lectures and Speakers

Anxiety Disorders in Youth: Efficacy and Adverse Effects of Psychopharmacologic Interventions

Jeffrey R. Strawn, MD: 2017 AACAP's 64th Annual Meeting

Psychopharmacologic Treatment of Tics and Tourette's Disorder of Psychopharmacologic Interventions

Barbara J. Coffey, MD, MS: 2017 AACAP's 64th Annual Meeting

Treating Depression in Children, Adolescents, and Young Adults

Boris Birmaher, MD: 2017 Pediatric Psychopharmacology Update Institute

Psychopharmacologic Treatment of Moods, Episodes, and Outbursts [Pediatric Bipolar Disorder Treatment]

Gabrielle A. Carlson, MD: 2017 AACAP's 64th Annual Meeting

Psychopharmacologic Treatment of Moods, Episodes, and Outbursts [Disruptive Mood Dysregulation Disorder Overview and Treatment]

Current Topics in Pediatric Psychopharmacology: An Online Advanced Course
