Mission

Promote the healthy development of children, adolescents, and families through research, training, prevention, comprehensive diagnosis, and treatment, and to meet the professional needs of child and adolescent psychiatrists throughout their careers.

AACAP Catchers in the Rye Awards

I keep picturing all these little kids playing some game in this big field of rye and all. Thousands of little kids, and nobody around—nobody big, I mean—except me. And I am standing on the edge of some crazy cliff. What I have to do, I have to catch everybody if they start over the cliff.

J.D. Salinger, The Catcher in the Rye

The American Academy of Child and Adolescent Psychiatry (AACAP) is honored to present its most prestigious awards, the AACAP Catchers in the Rye Awards, to our 2014 award recipients.
The AACAP Catchers in the Rye Humanitarian Award is awarded by the AACAP Executive Committee. It was established in 1990 to honor those who have made significant contributions to society through support of child and adolescent psychiatry. AACAP is honored to present the 2014 Catchers in the Rye Humanitarian Award to Gordon and Sharon Smith.

During his time serving in the U.S. Senate, Gordon H. Smith and his wife, Sharon, received the tragic news that their son, Garrett, then a 21-year-old college student, had died by suicide. The death of their son propelled Gordon and Sharon to embark on a mission to improve mental health programs and to combat the epidemic of youth suicide.

In Garrett’s memory, legislation was enacted into law. On October 21, 2004, President George W. Bush signed the Garrett Lee Smith Memorial Act, authorizing $82 million for suicide-prevention and awareness programs.

It is through these programs that millions of Americans have been helped. The Garrett Lee Smith Memorial Act provides states, tribal nations and organizations, and colleges and universities, with much needed funding to create and implement youth suicide prevention plans with a significant focus on early identification.

In his current role as President and CEO of the National Association of Broadcasters (NAB), Gordon unveiled in July 2013 a multiplatform public service campaign called “OK2Talk”, to increase understanding and awareness about mental health. Television and radio stations nationwide aired PSA spots to encourage this conversation, donating airtime valued at over $40 million, including more than 320,000 TV and radio airings. Gordon and Sharon hope that encouraging conversation about mental illness helps keep other families from suffering the loss of a loved one through suicide.

The Smiths have been at the forefront of advancing suicide prevention as a national priority, championing early identification, expanding access to mental health and suicide prevention treatment, and working to strongly advocate for the reduction of suicide in the U.S. They have turned a personal tragedy into powerful advocacy, creating a legacy of hope in Garrett’s name—assisting others who battle depression, and helping them to find hope and healing.

Gordon and his wife Sharon live in Bethesda, MD, and are the parents of three children and two grandchildren.

“Garrett’s death came with a call to action. We dedicated ourselves to helping those who struggle with mental illness and those who are at risk for suicide. We hope our efforts have saved other families from experiencing the loss of their child, spouse, or a loved-one. Sharon and I are humbled to be recognized by AACAP and thank this wonderful organization for this honor and for advancing the cause of mental health.”
The AACAP Catchers in the Rye Award to an Individual was established in 1996 to recognize an individual for his or her outstanding advocacy efforts on behalf of children and adolescents. AACAP is honored to present Syed Arshad Husain, MD with the 2014 Catchers in the Rye Award to an Individual.

Dr. Syed Arshad Husain is professor emeritus of psychiatry and child health at the University of Missouri where he began his professional career 45 years ago and retired as the training director and division chief of child and adolescent psychiatry. Currently, he serves as the medical director of a large behavioral health organization. He has authored five books and over fifty scientific papers on child and adolescent psychopathology.

Dr. Husain's energies have been focused on helping children facing difficult circumstances. He has visited eighty war zones and disaster areas in eighteen different countries. In 1994, he founded the International Center for Psychosocial Trauma and developed the “Teachers As Therapists” program that involves training teachers to identify symptoms of psychological trauma in children and develop skills to help them. He has used this model worldwide including in Bosnia, Kosovo, Palestine, New Orleans after Katrina, and Joplin. In Pakistan, he founded the “Mothers As Teachers” School for socio-economically deprived children, training local mothers to teach an elementary education curriculum in classes held at their homes. To address a psychiatrist shortage in rural Missouri, Husain trained over one hundred primary care physicians in psychiatry, child psychiatry, and psychopharmacology. Annually, he organizes a course in disaster and trauma psychiatry for teachers, counselors, and mental health professionals. Husain’s humanitarianism and advocacy for children has been recognized by APA, AMA, the National Council of Behavioral Health, and others.

“Children are the most precious gift of our creator. They are our saving message of tomorrow. Their time should be of joy and peace, playing, learning, and growing. Unfortunately, poverty, abuse, exploitation, and violence are shattering the lives of many. We must renew a commitment to the health and welfare of all the children of the world with compassion, advocacy, and hope.”
The AACAP Catchers in the Rye Award was established in 1996 to recognize an AACAP committee for its outstanding efforts on behalf of children and adolescents. This year’s award recognizes the Task Force on the Relationship Between AACAP and the Biomedical Industry, chaired by Marilyn B. Benoit, MD, LFAACAP.

“It is with profound appreciation and gratitude that I accept this honor on behalf of the members of the Task Force on the Relationship Between AACAP and the Biomedical Industry. We were brought together by our past president, Martin J. Drell, MD, who appointed the Task Force and articulated a charge that initially seemed rather overwhelming. We all knew just how controversial an issue this has been in AACAP for at least the past 15 years. Matthew Siegel, MD cautioned us that we would need to treat this as a research project, with objectivity being critical. With that, we charged forward, gathering, discussing, debating, and analyzing information from a variety of sources. We struggled through some sticky issues with incredible thoughtfulness and respect. The report lists all our sources, including all the individuals we interviewed. We were fortunate to settle on using the Apperson Crump, PLC firm to develop and manage the survey, which was scientifically prepared. We were determined to always focus on AACAP’s mission: serving the well-being of children and families, a goal we felt that we accomplished. We hope that our recommendations to AACAP will serve as a guide for present and future leaders.” Marilyn B. Benoit, MD, LFAACAP.

Members of the Task Force on the Relationship Between AACAP and the Biomedical Industry

Marilyn B. Benoit, MD, LFAACAP
William Bernet, MD
John E. Dunne, MD
Mary Margaret Gleason, MD
Sheryl H. Kataoka, MD
Debra E. Koss, MD
Douglas K. Novins, MD
Matthew Siegel, MD
Marika Wrzosek, MD

The Task Force on the Relationship Between AACAP and the Biomedical Industry receives its award during the AACAP Assembly of Regional Organizations on Tuesday, October 21 from 8:00 a.m.–4:00 a.m.
The AACAP Catchers in the Rye Award to a Regional Organization was established in 1996 to recognize a Regional Organization for their outstanding advocacy efforts on behalf of children and adolescents. AACAP is honored to present the Georgia Council of Child and Adolescent Psychiatry, Inc. with the 2014 Catchers in the Rye Award to a Regional Organization.

The Georgia Council on Child and Adolescent Psychiatry, Inc. was founded in the early 70s for the expressed purpose of supporting the interests of children, adolescents, and their families and promoting the specialty of child and adolescent psychiatry within the State of Georgia. It is made up of child psychiatrists throughout the state. In recent years, realizing their common goals, the Georgia Council on Child and Adolescent Psychiatry, Inc. engaged its colleagues in the Georgia chapter of the American Academy of Pediatrics to the mutual benefit of all their patients. They have invited a liaison to sit on each other’s executive board to promote communication and cooperation. Together, they take great pride in advocating for the health and well-being of children and adolescents within the State of Georgia.

In July 2013, shortly after the CPT codes were changed by the American Medical Association, psychiatrists in the State of Georgia began to notice that they were not being reimbursed for Medicaid patients for psychotherapy add-on codes. This represented a direct threat to the ability of children and adolescents to obtain needed psychotherapy services. The Georgia Council of Child and Adolescent Psychiatry, Inc. contacted its legislative consultant, Ms. Lasa Joiner, for guidance. Despite the fact that she did not fully understand all the details of the problem, she contacted Mr. Clyde Reese, the Commissioner for Department of Community Health, on its behalf to set up a meeting. At the conclusion of the meeting, he asked Georgia Council of Child and Adolescent Psychiatry, Inc. to submit a letter detailing the concerns in clear, specific terms. With the able assistance of the membership chair, Sandra B. Sexson, MD, the Georgia Council of Child and Adolescent Psychiatry, Inc. composed a letter explaining the concerns. Approximately 6 weeks later, a notice from Mr. Jerry Dubberly, Medicaid Director for the State of Georgia, stating that the requested changes had been implemented.

“On behalf of the Georgia Council on Child and Adolescent Psychiatry, I wish to thank the Academy for its emphasis on advocacy in recent years. The training and advice that we received were instrumental in directing us to seek action. I further wish to thank Ms. Lasa Joiner, for her guidance, Commissioner Clyde Reese, Medicaid Director Dr. Jerry Dubberly, and their staff for meeting with us, listening to us, and working with us to improve access to treatment for these children. It is truly amazing what we can accomplish when we work together as a team.” —Eric Lewkowiez, MD, FAPA
The Virginia Q. Anthony Outstanding Woman Leader Award is awarded by AACAP’s President. It was established in 2013 to celebrate the lifetime achievements of extraordinary women in the field of child and adolescent psychiatry. As its namesake envisioned, the award is for women who have applied their talent, medical skills, and leadership to dramatically improve the wellbeing of children with mental illnesses. AACAP is honored to present the 2014 Virginia Q. Anthony Outstanding Woman Leader Award to Marilyn B. Benoit, MD, LFAACAP.

Dr. Marilyn Benoit, Past President of AACAP (2001–2003), is currently the Senior Vice President of Clinical and Professional Affairs, Chief Medical Officer, and Chief Clinical Officer of Devereux, a national, not-for-profit behavioral health organization. Dr. Benoit has enjoyed providing leadership throughout her career. As AACAP’s President, she forged a partnership with the Child Welfare League of America to form a coalition of 70 national stakeholders to address issues of concern in the foster care system. The coalition’s focus was to minimize trauma in this vulnerable population, professionalizing the role of first responders, decreasing foster care bouncing, increasing permanency, and ensuring the quality of psychiatric care. Dr. Benoit has a special interest in governance. She has served on the Board of Trustees of Children’s National Medical Center (as Chief of Service of the Department of Child and Adolescent Psychiatry), CWLA, Devereux, and AACAP (11 years). She co-founded and chaired the Alliance for Childhood, a not-for-profit organization with a mission to keep play in childhood. She serves on the Advisory Boards at the University of Pennsylvania’s Field Center for Social Policy and BestKids, a Washington, DC, mentoring organization for foster children. Dr. Benoit was the first Chair of AACAP’s Child Abuse Committee, for which she personally advocated with then AACAP President, Richard L. Cohen, MD. Dr. Benoit ascribes her leadership skills to modeling by both of her parents who provided leadership within their community. She is proud to define her leadership as “servant leadership,” seeing herself as the person who sets direction with clear expectations, rewards initiative and creativity, and provides the resources for others to get the job done in a timely manner.

“Having served as President while working collaboratively and productively with our beloved Virginia Q. “Ginger” Anthony, our then-Executive Director, it is especially meaningful to humbly accept an award that honors her tremendous legacy of leadership at AACAP. Thanks to the Academy for affording me so many leadership opportunities over the years.”
The AACAP Sidney Berman Award for the School-Based Study and Treatment of Learning Disorders and Mental Illness acknowledges outstanding leadership in the public education and treatment of learning disabilities. Albert Abramson, President of the Abramson Family Foundation, established this award in 1996 as a tribute to founding member and AACAP past president (1967–1971) Sidney Berman, MD.

Dr. James P. Comer is a professor of child psychiatry at the Yale University Child Study Center, a position he has held since 1975. Dr. Comer first joined the faculty and founded the Comer School Development Program in 1968, a program that has significantly improved behavior and academic achievement among numerous children nationwide. He has written numerous articles and books on education, human development, and race relations. He has significantly influenced key areas of education through participation in major practice and policy initiatives nationwide and internationally. He has served on several university, foundation, and private sector boards. He has received many awards for his work, including 48 honorary degrees. In 2014, President Barack Obama appointed Dr. Comer to his Advisory Commission on Educational Excellence for African Americans. Dr. Comer received a BA from Indiana University, an MD from Howard University, and an MPH from the University of Michigan. He did his training in psychiatry at the Yale University School of Medicine. He is a member of the Institute of Medicine and the American Academy of Arts and Sciences.

“I am honored to receive the 2014 Sidney Berman Award. This work grew out of my lifelong interest in giving poor, non-mainstream children the same opportunities that I received. Thus, I want to thank my parents and family, community, and colleagues who made my development, learning, experiences and opportunities possible. I hope my work will positively influence the lives of my children and their families, and all children.”
The AACAP Cancro Academic Leadership Award recognizes a currently serving General Psychiatry Training Director, Medical School Dean, CEO of a Training Institution, Chair of a Department of Pediatrics, or Chair of a Department of Psychiatry for his or her contributions to the promotion of child and adolescent psychiatry. This award is presented in even numbered years. Brooke Garber Neidich established this award in 2003 in honor of Robert Cancro, MD.

Dr. David T. Feinberg has been CEO of UCLA’s hospitals and associate vice chancellor of UCLA Health Sciences since 2007; on July 1, 2011, he assumed the position of president of UCLA Health System. As president, Dr. Feinberg oversees all aspects of UCLA Health, which include the four UCLA hospitals—Ronald Reagan UCLA Medical Center, Stewart and Lynda Resnick Neuropsychiatric Hospital at UCLA, Mattel Children’s Hospital UCLA in Westwood, and UCLA Medical Center, Santa Monica—as well as the UCLA Faculty Practice Group. UCLA’s hospitals treat more than 45,000 patients each year, and two million patients are seen annually in UCLA’s 150 community offices. UCLA hospitals are consistently rated among the top hospitals in the nation by U.S. News and World Report, and Ronald Reagan UCLA Medical Center has been ranked “Best in the West.”

“We are in the business of taking care of people. It doesn’t matter if you are a doctor, a nurse, a janitor, or if you carry a leadership title, we all must champion and execute on the common goal of coming in every day to make sure we take care of our next patient.”
Dr. Argyris Stringaris presents “Mapping Clinical Phenotypes Onto Pathophysiological Mechanisms: Opportunities and Challenges” during Honors Presentation 2 on Thursday October 23 from 9:30 a.m.–10:20 a.m.

The AACAP Klingenstein Third Generation Foundation Award for Research in Depression or Suicide recognizes the best paper published in the Journal of the American Academy of Child and Adolescent Psychiatry on depression and/or suicide, written by a child and adolescent psychiatrist, and published between July 2013 and June 2014. The award is supported by the Klingenstein Third Generation Foundation which established this award in 1999.

Dr. Argyris Stringaris is senior lecturer and Head of the Mood and Development Laboratory at the Institute of Psychiatry, King’s College London. Dr. Stringaris trained at the Maudsley Hospital (MRCPsych), the Institute of Psychiatry at King’s College London (PhD), and the National Institutes of Health (Clinical Research Fellow) in the USA. His aim is to understand what makes some people more depressed, irritable, or euphoric than others and how changes in mood affect the wellbeing of people. His colleagues and he use epidemiological, imaging, and genetic methods to answer our research questions. They are funded by the Wellcome Trust and the Biomedical Research Centre. Currently, they are using large-scale imaging data from epidemiological samples to map dimensional phenotypes to neural mechanisms. They are also running randomized-controlled studies of drug probes using fMRI as an outcome to help them better understand treatment targets for bipolar depression. As a clinical psychiatrist, Dr. Stringaris sees and treats children and families who suffer from depression, bipolar disorder, or severe irritability. His team, the National and Specialist Mood Disorder Clinic in the Michael Rutter Centre of the Maudsley Hospital in London, provides a specialist multidisciplinary service for children with depression, bipolar disorder, and severe irritability.

“Children with mood disorders deserve better than what our current state of knowledge can offer. It is imperative that we better understand the pathophysiology of depression and bipolar disorder in order to improve our ability to recognize and treat young people. It must be the common aim of every one of us clinicians to contribute to this effort.”
AACAP Irving Philips Award for Prevention
John N. Constantino, MD

The AACAP Irving Philips Award for Prevention recognizes a child and adolescent psychiatrist and AACAP member who has made significant contributions in a lifetime career or single seminal work to the prevention of mental illness in children and adolescents. Named in honor of AACAP past president, Irving Philips, MD (1985–87), the award was established in 1993 by Dr. Philip’s brother, Jesse Philips. A prevention program or center of the award recipient’s choice receives a donation as part of the award honorarium.

Dr. John N. Constantino is the Blanche F. Ittleson Professor of Psychiatry and Pediatrics at Washington University, St. Louis, Missouri, where he is Division Director of Child Psychiatry, principal investigator of an NICHD Intellectual and Developmental Disabilities Research Center, and Psychiatrist-In-Chief of St. Louis Children’s Hospital. In 1993, he completed a Triple-Board residency directed by Edward Sperling, MD at the Albert Einstein College of Medicine, Bronx, NY. Dr. Constantino’s work has focused on understanding genetic and environmental influences on human social development, and on public health approaches to the prevention of social disability. In early career work, his team developed quantitative methods for elucidating the prevalence, cause, and population structure of inherited deficits in reciprocal social behavior; these methods are currently in use world-wide. Findings from subsequent studies of causal influence on early antisocial behavior informed the design of the SYNCHRONY Project, which addresses unmet mental health needs of young children and birth parents in the child welfare system. This program is in collaboration with the Family Courts and modelled after the pioneering work of Charles H. Zeanah, MD and colleagues (Tulane University) to prevent child maltreatment recidivism. Other targeted preventive intervention efforts at Washington University include facets of Joan L. Luby, MD’s Early Emotional Development Program, Cynthia Rogers, MD’s Perinatal Behavioral Health Service at St. Louis Children’s Hospital, and Constantino and colleagues’ implementation of parenting education in Early Head Start, as a Buffering Toxic Stress site of the U.S. Administration for Children and Families.

“On behalf of a ‘village’ of Missouri collaborators, I am delighted to receive this award. Prevention is the inherent promise of our field, and deserves to be raised to the highest possible priority. It is gracious for the Academy to recognize earnest steps toward that goal, reflecting the collective hope that prevention will become a universal standard of clinical practice.”
The AACAP Norbert and Charlotte Rieger Psychodynamic Psychotherapy Award, supported by the Norbert and Charlotte Rieger Foundation, recognizes the best published or unpublished paper written by a member of AACAP. The winning paper addresses the use of psychodynamic psychotherapy in clinical practice and fosters development, teaching, and practice of psychodynamic psychotherapy in child and adolescent psychiatry. AACAP is honored to present the 2014 Rieger Psychodynamic Psychotherapy Award to Michael Shapiro, MD, for his paper “Pseudohallucinations in an Adolescent: Considerations for Diagnosis and Treatment.”

Dr. Michael Shapiro attended the University of Florida (UF) in Gainesville for undergraduate studies and completed the Junior Honors Medical Program—a combined 7-year BS/MD program. In medical school, Dr. Shapiro was inducted into the Chapman Society, a branch of the Gold Humanism Honor Society, and performed original research in the Department of Neurology, studying the onset of pathological gambling in patients with Parkinson’s disease. During residency, Dr. Shapiro’s interests became more focused on child and adolescent psychiatry, and he published papers on functional abdominal pain, Munchausen syndrome by proxy, and non-epileptic seizures. He received the John E. Adams Memorial Academic Achievement Award and the John Kuldau Memorial Research Award. Dr. Shapiro began his child and adolescent psychiatry training at UF in 2011 and served as the Chief Child Psychiatry Fellow for the 2012–2013 academic year. He has published several more papers and has presented at national conferences on the subjects of adolescent conversion disorder and eating disorders. Dr. Shapiro was selected as a Child PRITE Fellow by the American College of Psychiatrists from 2011–2013 and currently serves as a member of the PRITE Editorial Board. He graduated fellowship in 2013 and joined the UF Child Psychiatry faculty, where he currently serves as the Assistant Clinic Director of Child and Adolescent Psychiatry and the Assistant Medical Director of Psychiatry and Psychology at the UF Springhill Health Center.

“This is a tremendous honor to receive an award bearing Dr. Rieger’s name. His passion for child and adolescent psychiatry and focus on treating the individual is an inspiration, and I hope to continue in his tradition of helping patients and families. I am thankful to AACAP for this opportunity.”
The AACAP Norbert and Charlotte Rieger Award for Scientific Achievement recognizes the best paper published in the Journal of the American Academy of Child and Adolescent Psychiatry from July 2013–June 2014. Established in 1988, the award is supported by the Norbert and Charlotte Rieger Foundation. The award recipient, Young Shin Kim, MD, MS, MPH, PhD, is recognized for her paper, “Prevalence of Autism Spectrum Disorder and Social Communication Disorder in a Total Population: Plus Ça Change, Plus C’est la Même Chose.”

Dr. Young Shin Kim is a graduate of Yonsei University College of Medicine in South Korea and has completed her combined clinical and research training at Yale Child Study Center while she was also earning an MPH at Yale School of Public Health. After completing her PhD in epidemiology at the University of California, Berkeley, she served as a faculty member at Yale; she recently joined the University of California, San Francisco, Department of Psychiatry. Her research has focused on understanding the roles of genes, environment, and their interactions in the etiology of developmental psychopathology, especially neurodevelopmental disorders, using genetic epidemiological research methods. Dr. Kim’s contribution to the understanding of the prevalence and broad phenotypic spectrum of autism spectrum disorders, as well as her studies of school bullying and her community outreach efforts, were recently acknowledged by President Barack Obama when she was presented the Presidential Early Career Award for Scientists and Engineers in 2014.

“I try to keep the principle in my mind to know what we see rather than to see what we know' by A.J. Heschel, which helps me to learn new and accurate things from my patients and their families as well as from my research.”
The AACAP Norbert and Charlotte Rieger Service Program Award for Excellence recognizes innovative programs that address prevention, diagnosis, or treatment of mental illnesses in children and adolescents, and serve as model programs to the community. Supported by the Norbert and Charlotte Rieger Foundation, the award was established in 1996.

Dr. George Realmuto is a professor of psychiatry at the University of Minnesota and Medical Director of the Child and Adolescent Behavioral Health Service for the State of Minnesota. Melding his passion for advocacy for mentally ill children, enamored by the public health perspective, and driven by an unremitting series of questions, Dr. Realmuto has found a number of satisfying paths including co-development of the Early Risers “Skills for Success” prevention program.

The author or co-author of nearly 100 peer reviewed articles, he has written on the dimensions of pediatric trauma, the biological basis of Autism, and the methods, processes, and outcomes of the prevention of adverse outcomes in children with early stage behavioral disorders.

Community service is a major stage for action and effort. Dr. Realmuto’s work in this area includes participating in the drafting of the first and only Minnesota children’s mental health law defining the array of needs that must be addressed by each county. As a member of both the state child psychiatry and general psychiatry professional organization council, he has influenced public policy, member engagement, and organizational reorganization.

Teaching and learning are the most gratifying endeavors for the academic clinician. Residents and fellows and the patients who have shared their stories with him over many years contributed much to his understanding that is the richness and depth in the human condition.
The AACAP Jeanne Spurlock Lecture and Award for Diversity and Culture recognizes individuals who have made outstanding contributions to the recruitment of child and adolescent psychiatry from all cultures. This award was established in 2002 in honor of Jeanne Spurlock, MD, a giant in child and adolescent psychiatry and in advocacy for children, adolescents, and their families from all cultures.

Dr. Alfiee M. Breland-Noble is Director of The AAKOMA (African American Knowledge Optimized for Mindfully-Healthy Adolescents) Project and Associate Professor at the Georgetown University Medical Center. She is an adolescent and child psychologist and a researcher in academic medicine externally and federally funded for over 10 years. She is a recognized expert in adolescent depression and racial disparities in mental health as evidenced by her recent appointments to the American Psychological Association Treatment Guideline Development Panel for Depression Across the Lifespan (where she is the only child and adolescent disparities researcher) and the Patient Centered Outcomes Research Institute (PCORI), Addressing Disparities National Advisory Panel (which she was elected to from over 1,200 applicants nationwide). She is also recognized for her ability to translate complex scientific concepts for lay audiences and for her skill at including underrepresented and hard-to-reach populations in clinical research. Dr. Breland-Noble’s research expertise includes: reducing mental health disparities for African American and diverse adolescents; depression treatment engagement in diverse adolescents; mental health stigma reduction in diverse populations; health equity in community-based suicide prevention and Community-Based Participatory Research (CBPR) with a specific focus on Faith-Based Mental Health Promotion.

“Paraphrasing the eloquent Anna Julia Cooper, “Confidently, I can say ‘when and where I enter, in the quiet, undisputed dignity of my womanhood, without violence and without suing or special patronage, then and there [diverse people striving for change] enter with me.’” Encouraging diverse youth to embrace their uniqueness and seek personal freedom and fulfillment is something that Dr. Jeanne Spurlock embodied throughout her career and something I strive for daily. I am humbled to receive this award named for my fellow Howard University alumna, trailblazer, and inspiration to many.”
The AACAP George Tarjan Award for Contributions in Developmental Disabilities recognizes a child and adolescent psychiatrist and AACAP member who has made significant contributions in a lifetime career or single seminal work to the understanding or care of those with mental retardation and developmental disabilities. The award was established in 1993 in honor of AACAP past president (1977–1979) George Tarjan, MD, by his wife, Mrs. George Tarjan, and friends.

Dr. Matthew State graduated from Stanford University (1984) and Stanford University School of Medicine (1991) and completed his residency in psychiatry and fellowship in child psychiatry at the UCLA Neuropsychiatric Institute. He then went on to earn a PhD in genetics at Yale (2001). He joined the Yale faculty in 2001 and remained there until 2013 where he was the Donald J. Cohen Professor of Child Psychiatry, Psychiatry and Genetics, the founder and co-director of the Yale Program on Neurogenetics, and the Vice Chair for Research in the Department of Psychiatry. In 2013, he moved to the University of California, San Francisco, where he is now the Oberndorf Family Distinguished Professor and Chair in the Department of Psychiatry and Director of the Langley Porter Psychiatric Institute and Hospital. Dr. State’s research has focused on the genetics and genomics of childhood neurodevelopmental disorders, including autism, Tourette’s disorder, and brain malformation syndromes. He currently co-leads several national and international collaborations aimed at gene discovery and elaborating the neurobiology of childhood disorders, including the Autism Sequencing Consortium, and the Tourette International Collaborative Genetics Study, both funded by the National Institute of Mental Health. He is a Simons Foundation Investigator and serves on the Board of Scientific Counselors of the National Institute of Mental Health as well as on the advisory boards of the Simons Simplex Collection, the Autism Science Foundation and the Child Mind Institute. He was the 2012 recipient of the Ruane Prize for Research in Child and Adolescent Psychiatry and, in 2013, he was elected as a member of the Institute of Medicine of the National Academy of Sciences.

“It is an honor and privilege to receive the Tarjan award, named after one of the legends in our field and at UCLA where I trained. And, from mentors like Dr. Tarjan, I have learned to value the role of clinicians in the science of developmental disabilities. As I pursue a better understanding of the causes and treatments of neurodevelopmental disorders, I use the tools of genetics to unlock the mysteries of the brain and its function, however my patients serve as ever-present guides and provide constant reminders of the meaning and importance of my work.”
The Ülkü Ülgür, MD International Scholar Award recognizes a child and adolescent psychiatrist or a physician in the international community who has made significant contributions to the enhancement of mental health services for children and adolescents. The award was established in 2013 with a donation from AACAP member Ülkü Ülgür, MD. AACAP is honored to present the Inaugural Ülkü Ülgür, MD International Scholar Award to Dr. Füsun Çuhadaroğlu Çetin.

Dr. Füsun Çuhadaroğlu Çetin completed her training at Hacettepe University, studying adolescent psychiatry in the United Kingdom and did a visiting fellowship at Children’s Hospital, Boston, MA. She had further training in psychodynamic psychotherapy and self-psychology and was certified by the professional education program of Harvard Macy Institute. She did a research fellowship at the National Institutes of Health-Fogarty International Center (NIH-FIC) focusing on the International Mental Health and Developmental Disabilities Research Training Program and continued as a mentor. She and her colleagues founded the Turkish Association for Child and Adolescent Mental Health (CAMH), and child and adolescent psychiatry (CAP) was established as a separate discipline by their efforts. She started annual CAP congresses, adolescent symposia, CAP policy workshops, and published a CAP textbook in Turkish. Her efforts had an important impact on increasing awareness and the number of professionals for CAMH and qualification of CAP training. During her presidency, connections were developed with AACAP where she also worked on the AACAP International Relations Committee.

Dr. Çuhadaroğlu stepped into international work in 1993 as an invited speaker on “Workshop on Adolescence”, organized by the World Health Organization (WHO), The United Nations Children’s Fund (UNICEF), and the International Psychoanalytical Association (IPA), followed by presenting symposia, workshops, and lectures at meetings of the International Association for Child and Adolescent Psychiatry and Allied Professions (IACAPAP), The European Society for Child and Adolescent Psychiatry (ESCAP), the International Society for Adolescent Psychiatry and Psychology (ISAPP), AACAP, and others. She organized the 18th World Congress of IACAPAP and Regional Conference of ISAPP, lectured on the International Certificate Program of the International Children’s Center (ICC), and worked on the WHO team developing the CAP program in Albania. She directed and participated in projects supported by NIH-FIC, the United Nations Population Fund (UNFPA), UNICEF, World Bank, and the Willow Foundation. She is currently a member of AACAP Adolescent Committee, Editorial Advisory Board of Adolescent Psychiatry and Board of ESCAP, vice president of ISAPP, and Secretary General of IACAPAP.

“I am honored to be the recipient of this award from AACAP, named after Dr. Ülkü Ülgür, who has been a very motivating role model to me and many others through his important international work.”
The Simon Wile Leadership in Consultation Award acknowledges outstanding leadership and continuous contributions in the field of consultation-liaison child and adolescent psychiatry. The award is named after Simon Wile, MD, a renowned pediatrician and a lifelong supporter of child and adolescent psychiatry and was established in 2003 with a donation from the Massachusetts General Hospital.

Dr. Barry Sarvet is Clinical Professor of Psychiatry at Tufts University School of Medicine, and Chief of Child Psychiatry and Vice Chair of the Department of Psychiatry at Baystate Medical Center. Dr. Sarvet graduated from Northwestern University School of Medicine and completed his adult and child psychiatry training at Yale University. His special interests include programmatic strategies for collaboration between child psychiatry and primary care physicians and the integration of mental health within pediatrics. In his role as Medical Director of the Massachusetts Child Psychiatry Access Project, Dr. Sarvet has helped develop the program into a national model for improving access to child psychiatry, currently being replicated in many states across the country. Dr. Sarvet has published numerous papers on topics surrounding the integration of child psychiatry in primary care and has worked with numerous states throughout the country to support their efforts to develop similar programs. He helped to organize the National Network of Child Psychiatry Access Programs, a group devoted to the dissemination and promotion of best practices in this field. He has also worked within AACAP for many years to promote the advancement of collaborative child psychiatry practice through advocacy, policy development, and educational initiatives with his active service on the Healthcare Access and Economics Committee, Committee on Collaboration with Medical Professionals, and the Task Force on Healthcare Delivery Systems. He also serves as the Co-Chair of the AACAP Task Force on Health Information Technology. Dr. Sarvet’s career has also been focused on the dissemination of evidence-based trauma-informed psychotherapy practices in community settings, and he is currently leading a Substance Abuse and Mental Health Administration (SAMHSA)-funded project under the auspices of the National Child Traumatic Stress Network to adapt Trauma-Focused Cognitive Behavioral Therapy (TF-CBT) for delivery by in-home therapy teams.

“I am honored to receive the 2014 Simon Wile Leadership in Consultation Award and am indebted to my wonderful colleagues within the Massachusetts Child Psychiatry Access Project whose enormous dedication has made our program a success. Our work to promote the inclusion of child psychiatry in primary care offers the possibility of improving access to care and reducing the stigma associated with childhood mental illness. It has been exciting to witness the growth of interest in this field in recent years, and I look forward to working with my extraordinary colleagues who are advancing this work throughout the country.”
AACAP New Distinguished Fellows

AACAP congratulates the following members elevated to Distinguished Fellows between October 1, 2013, and October 1, 2014

Robert Chayer, MD, of Milwaukee WI—AACAP member since 1992
Mary Lynn Dell, MD, DMin, of Dublin, OH—AACAP Member since 1989
Salma Malik, MD, MS, of Farmington, CT—AACAP Member since 2006
Jane J. Miles, MD, of Dallas, TX—AACAP Member since 2003
Jeffrey R. Strawn, MD, of Cincinnati, OH—AACAP Member since 2008
The following child and adolescent psychiatry residency program directors recruited all of their residents to be members of AACAP. Since child and adolescent psychiatry residents are the future of both AACAP and the field of child and adolescent psychiatry, AACAP acknowledges and warmly thanks the following Residency Program Directors for their support. All of their residents have become AACAP members as of October 1, 2014.

The Center for Mental Health Services (CMHS)–AACAP Fellow was designed to familiarize a child and adolescent psychiatry resident with public-sector service and community-based child and adolescent psychiatry policy and practice. Applications are taken from residency programs within the Washington, DC, area. The fellow works one day a week at CMHS, thereby receiving an introduction into the operation of the federal government, including the participation in federal and state programs for children who have mental health challenges. Additionally, the fellow automatically serves on AACAP’s Committee on Community-Based Systems of Care.

Dr. Tushita Mayanil has had a keen interest in early-onset psychosis and individuals at risk for psychosis. At different stages of her training, she has actively participated in various aspects of research related to psychosis and mood disorders. These include clinical research, drug trials, and functional imaging research. She pursued the Substance Abuse and Mental Health Administration (SAMHSA)-AACAP Systems of Care Fellowship during the second year of her child and adolescent fellowship at the Children’s National Medical Center, Washington, DC. The goal of the fellowship was to envision and develop a community-based systems of care approach towards evidence-based early identification and possibly intervention for individuals at risk for psychosis. She worked collaboratively with the staff at SAMHSA and AACAP to develop a document detailing her findings. She also worked actively with the various sub-groups in AACAP’s Committee on Community-Based Systems of Care to develop various educational documents for the AACAP website.
The 2014 Systems of Care Special Program Clinical Projects, co-sponsored by AACAP’s Committee on Community-Based Systems of Care and the AACAP Transitional Age Youth and College Student Mental Health Committee, provides child psychiatrists and other mental health providers with the knowledge, skills, and attitudes needed to better serve individuals with mental health challenges during their transitional age years (ages ~15—~25). The Clinical Projects, funded by SAMHSA’s Center for Mental Health Services, provide support for AACAP residents and fellows to learn more about providing care to children in community-based settings by offering the opportunity to participate in the Systems of Care Learning Community which includes: mentoring by members of the Systems of Care Committee; poster presentations on systems of care topics; and attending the Special Program and other relevant Annual Meeting events.

Sailaja Akella, DO—Hofstra North Shore Long Island Jewish School of Medicine

Dawn Sung, MD—NYU Child Study Center
Jerome H. Taylor, MD—Yale Child Study Center
Dimas J. Tirado-Morales, MD—Drexel School of Medicine
Janani Venugopalakrishnan, MD, MPH—University of Kentucky
The AACAP Beatrix A. Hamburg, MD Award for the Best New Research Poster by a Child and Adolescent Psychiatry Resident was established in 1996 through a grant from the Greenwall Foundation and the Klingenstein Third Generation Foundation in honor of Beatrix A. Hamburg, MD, former president of the William T. Grant Foundation and an AACAP Life Fellow. This award honors her commitment to the education and development of young investigators by recognizing the best new research poster by a child and adolescent psychiatry resident and AACAP member.

Dr. Sean F. Ackerman is a first year child and adolescent psychiatry fellow at the University of Vermont, where he also completed his general adult psychiatry training. He received his bachelor of fine arts from New York University and his doctor of medicine from the University of Washington.

Prior to medical school, Dr. Ackerman spent time as a one-to-one aide working with a boy who had autism in a kindergarten classroom. Seeing the world through this child’s eyes began a path that has focused Dr. Ackerman’s research interests on autism. More specifically, Dr. Ackerman is interested in both trying to help understand the genetics of autism while also being concerned with the ways in which having a diagnosis of autism impacts the social, behavioral, and medical services these children receive.
AACAP John F. McDermott, MD Assistant Editor-In-Residence for the Journal of the American Academy of Child and Adolescent Psychiatry
Michelle S. Horner, DO

The John F. McDermott, MD Assistant Editor-in-Residence position provides the opportunity for an early-career child and adolescent psychiatrist to join the editorial team of the Journal of the American Academy of Child and Adolescent Psychiatry (JAACAP) for two years. Working closely with the Editor-in-Chief and Editor Emeritus John F. McDermott, MD, the Assistant Editor-in-Residence will acquire an intimate understanding of the editorial processes behind the production of the Journal. The long-term goal of this position is to foster the professional growth of child and adolescent psychiatrists interested in the editorial process. The award was established in 2006 in honor of John F. McDermott, MD, JAACAP editor from 1988–1997.

Dr. Michelle S. Horner is Assistant Professor of Psychiatry at the University of Pittsburgh School of Medicine, Western Psychiatric Institute and Clinic. She completed her medical education at Michigan State University College of Osteopathic Medicine, general residency at Henry Ford Hospital, and child and adolescent psychiatry fellowship at the University of Pittsburgh.

She is a Clinical Researcher under the National Institute on Drug Abuse—AACAP-NIDA K12 Physician Scientist Career Development Award Program, where she examines biological and early environmental factors associated with risk for developing addiction. Clinically, Dr. Horner uses telemedicine to provide child and adolescent psychiatry services to her old hometown of Johnstown, PA.

As the founding editor of JAACAP Connect, the new online JAACAP extension, Dr. Horner combines her interest in mentorship, publication, and residency curriculum development. A core mission of JAACAP Connect is to engage trainees and practitioners in the process of learning throughout the lifespan via readership, authorship, and publication experiences that emphasize translation of research findings into the clinical practice of child and adolescent psychiatry. Visit www.jaacap.com/content/connect to learn more about Connect and how to get involved!

“Andrés Martin, MD, MPH, Jack McDermott, MD, and the previous JAACAP Editors-in-Residence are an inspiration, and I am honored to be part of the JAACAP tradition. Creating JAACAP Connect under their guidance, and with the input of numerous AACAP members and staff, has been a highlight of my training and career. I am thankful for the opportunity afforded by this award.”
The AACAP Robinson-Cunningham Award for the Best Paper by a Resident is named after J. Franklin Robinson, MD, and James M. Cunningham, MD, two past AACAP presidents who dedicated their lives to improving and expanding psychiatry services for children. This award recognizes an outstanding paper on some aspect of child and adolescent psychiatry started during residency and completed within three to five years of graduation.

Dr. Aviva K. Olsavsky is a third-year resident in adult psychiatry at the University of California, Los Angeles (UCLA), Semel Institute for Neuroscience and Human Behavior. Dr. Olsavsky received her undergraduate degree from Harvard University in 1998 and her MD from the David Geffen School of Medicine at UCLA in 2012. Prior to medical school, her research initially focused on molecular neuroscience exploring learning, memory, and synaptic plasticity in animal models and then transitioned to a more translational approach, utilizing PET and fMRI to learn about neuropsychiatric conditions including depression and epilepsy. During medical school, she completed an National Institutes of Health (NIH)/National Institute of Mental Health (NIMH) Clinical Research Training Program Fellowship with Dr. Ellen Leibenluft, examining face emotion processing in pediatric bipolar disorder. Following the fellowship, Dr. Olsavsky worked with Dr. Nim Tottenham at UCLA using fMRI to examine face emotion processing in the context of attachment relationships in children with a history of institutional rearing, looking specifically at the neural correlates of indiscriminate friendliness. Her current work with Mirella Dapretto, PhD focuses on the development of face processing from late childhood through adolescence, examining the interface between social cognition and emotional regulation, within a developmental context. In the future, Dr. Olsavsky plans to pursue a child and adolescent psychiatry fellowship.

“I am delighted to be chosen for the Robinson-Cunningham Award. I appreciate the valuable contributions of my co-authors and the tremendous mentoring that I received from Dr. Nim L. Tottenham, PhD. I am additionally indebted to Ellen Leibenluft, MD, Dr. Dapretto, and the UCLA residency program for their ongoing training and support. AACAP is a tremendous presence in the lives of trainees like myself, providing critical support, inspiration, and education.”
The AACAP John E. Schowalter, MD Resident Member of Council honors former AACAP President John E. Schowalter, MD (1989–1991). The Resident participates in the governance of AACAP by attending Council meetings for two years (2014–2016). This position encourages those new to the field of child and adolescent psychiatry to become familiar with AACAP functions as well as the overall governance of the association and in turn gives resident members of AACAP a voice on Council.

Dr. Jennifer C. Creedon grew up in Northern California and received her undergraduate degrees in biology and psychology at University of California, San Diego. She then moved to New Orleans to attend medical school at Tulane University School of Medicine. At Tulane, she developed interest in child and adolescent psychiatry, as well as medical education. She was named to the AOA Medical Honor Society and the Gold Humanism in Medicine Society. She then returned to the west coast to pursue adult psychiatry training at Oregon Health and Science University (OHSU), where she served as administrative chief resident and received an award for excellence in leadership from the Graduate Medical Education Committee. Her love for New Orleans drew her back to Tulane, where she is currently a first year fellow in child and adolescent psychiatry.

During her time at OHSU and Tulane, Dr. Creedon has developed interests in academics and residency training. Her clinical interests include psychosomatic medicine, first-break psychosis, and the impact of trauma on mental health. She hopes to remain involved in residency training after she completes her fellowship, and hopes to combine her passion for teaching with her clinical pursuits.

“I’m honored to be selected by AACAP as the John E. Schowalter, MD Resident Member of Council. I am deeply grateful for the outstanding mentorship I have received at both Tulane and OHSU, as well as for the ongoing support from family, friends, and colleagues. I am looking forward to working towards further increasing interest in child and adolescent psychiatry among medical students and psychiatry residents.”
AACAP Annual Meeting Junior Scholar Award Recipients

The AACAP Annual Meeting Junior Scholar Award program encourages research and other scholarly work from junior members of AACAP. Junior Scholars are defined as AACAP Members who are currently residents, child psychiatry fellows, or within 7 years of completing their child psychiatry clinical training. The program awards $500 travel stipends to Junior Scholars who have an accepted poster or oral presentation to attend the AACAP Annual Meeting in San Diego.

AACAP Pilot Research Award for Junior Faculty and Child and Adolescent Psychiatry Fellows, supported by Lilly USA, LLC

The AACAP Pilot Research Awards, supported by Lilly USA, LLC, aim to reduce the shortage in pediatric medical researchers, support young investigators at a critical stage, and encourage future careers in child and adolescent psychiatry research by providing up to $15,000 to support pilot research.

2013 Recipients:

**Michael Birnbaum, MD**  
Zucker Hillside Hospital  
Project: *The Role of Social Media and the Internet in Pathways to Care for Youth With Psychosis*  
Mentors: Christoph U. Correll, MD, and John Kane, MD

**Lawrence Fung, MD**  
Stanford University School of Medicine  
Project: *Developmental Pathodynamics of Connectional Neuroanatomy in a Mouse Model of Autism Spectrum Disorder*  
Mentor: Allan L. Reiss, MD

**Christina Khan, MD, PhD**  
Stanford University School of Medicine  
Project: *Empowering Girls to Take Charge of Their Health Through Mindfulness and Movement*  
Mentor: Victor G. Carrion, MD

2012 Recipient:

**Jatinder Chawla, MD**  
Hofstra North Shore Long Island Jewish School of Medicine  
Project: *Effects of Risperidone and Aripiprazole on Prolactin-Mediated Alterations in Sex Hormones, Sexual Functioning, and Bone Turnover in Antipsychotic-Treated Adolescents*  
Mentor: Christoph U. Correll, MD
AACAP Pilot Research Award for Attention Disorders, supported by the Elaine Schlosser Lewis Fund

The AACAP Pilot Research Award for Attention Disorders, supported by the Elaine Schlosser Lewis Fund, encourages junior faculty and child and adolescent psychiatry residents to pursue research careers in the area of attention disorders. Established in 2001, recipients receive grants of $15,000 for their pilot research. The Elaine Schlosser Lewis Fund is named in memory of Elaine Schlosser Lewis, a special education teacher, child advocate, and mother of AACAP member, Owen Lewis, MD.

2013 Recipient:

Jadon Webb, MD, PhD
Yale Child Study Center
Project: Effects of Stimulant Medications on Reaction Time in Healthy Subjects: A Meta-Analysis
Mentor: Michael H. Bloch, MD, MS

2012 Recipient:

Jeffrey R. Strawn, MD
University of Cincinnati College of Medicine
Project: The Neurophysiologic Impact of Anxiety on Attentional Processing in Adolescents with ADHD
Mentor: Melissa P. DelBello, MD, MS
The AACAP Educational Outreach Program provides the opportunity for child and adolescent psychiatry residents to receive a formal overview of child and adolescent psychiatry, establish mentor relationships with child and adolescent psychiatrists, and experience the AACAP Annual Meeting. Supported by the AACAP Endowment, recipients receive up to $1,000 of financial assistance to attend the AACAP Annual Meeting and must obtain a minimum of $300 of shared funding from a regional organization or institution.

Sean F. Ackerman, MD—University of Vermont
Daniel Medeiros Almeida, MD—Cincinnati Children’s Hospital Medical Center

The AACAP Jeanne Spurlock Minority Medical Student Fellowship in Substance Abuse and Addiction, supported by the National Institute on Drug Abuse (NIDA), is named in honor of Jeanne Spurlock, MD, in recognition of her lifetime of opening doors for colleagues from diverse backgrounds and fostering career advances. The summer fellowships encourage outstanding minority students to pursue careers in substance abuse and addiction research in child and adolescent psychiatry. The fellowships are administered through AACAP’s Department of Research, Training, and Education and the AACAP Substance Abuse and Addiction Committee, under the direction of Kevin Gray, MD, and Catherine Martin, MD.

Warren Alpert Medical School-Brown University  
Project: *Comparisons of Reversal Learning in Pediatric Bipolar Disorder and Autism Spectrum Disorder*  
Mentor: Jeffrey I. Hunt, MD, MS

Kyle J. Rutledge, PhD  
Western University of Health Sciences  
Project: *Impulsivity and Working Memory Relationships Within ADHD*  
Mentor: Murat Pakyurek, MD

Elizabeth Wagner  
Tulane University School of Medicine  
Project: *Exploring Maternal Perceptions of Children With Disruptive Behaviors*  
Mentor: Susan Wainwright, MD

Anna M. Wehry  
University of Cincinnati  
Project: *The Neuroanatomy of Anxious Depression in Adolescents: A Vowel-Based Morphometry Study*  
Mentor: Jeffrey R. Strawn, MD

Margaret R. Woodbury  
University of Maryland School of Medicine  
Project: *Racial Differences in Infant Telomere Length and the Moderation of Exposure to Interpersonal Violence*  
Mentor: Stacy S. Drury, MD, PhD
The NIDA-AACAP Resident Training Award in Substance Abuse and Addiction, supported by the National Institute on Drug Abuse (NIDA), offers up to $18,000 for one year for research support. This award aims to encourage general and child and adolescent psychiatry residents to pursue careers in the field of child and adolescent substance abuse and/or addiction treatment research.

**Recipients:**

**Lewei (Allison) Lin, MD**  
University of Michigan  
Project: *Trajectory of Prescription Opioid Misuse in Teens in Primary Care*  
Mentor: Fred C. Blow, PhD

**Amanda Roten, MD**  
Medical University of South Carolina  
Project: *Cognitive Outcomes With Abstinence in a Placebo-controlled Pharmacotherapy Trial for Youth With Marijuana Dependence*  
Mentor: Kevin Gray, MD

The winners of the NIDA-AACAP Resident Training Award in Substance Abuse and Addiction, supported by the National Institute on Drug Abuse, will present their projects at the New Research Posters Session 6 on Saturday, October 25, 2014 from 10:00 a.m.–12:30 p.m.
Acknowledgements

The American Academy of Child and Adolescent Psychiatry expresses appreciation to the following companies, organizations, and AACAP funds that have contributed to the AACAP’s 61st Annual Meeting:
