Mission

Promote the healthy development of children, adolescents, and families through advocacy, education, and research, and to meet the professional needs of child and adolescent psychiatrists throughout their careers.

Honors Book Editor: Alyssa Murphy, MA
AACAP Catchers in the Rye Awards

I keep picturing all these little kids playing some game in this big field of rye and all. Thousands of little kids, and nobody around—nobody big, I mean—except me. And I am standing on the edge of some crazy cliff. What I have to do, I have to catch everybody if they start over the cliff.

J.D. Salinger, The Catcher in the Rye

The American Academy of Child and Adolescent Psychiatry (AACAP) is honored to present its most prestigious awards, the AACAP Catchers in the Rye Awards, to our 2016 award recipients.
AACAP Catchers in the Rye Humanitarian Award
Lisa Yang, MBA

The AACAP Catchers in the Rye Humanitarian Award is awarded by the AACAP Executive Committee. It was established in 1990 to honor those who have made a significant contribution to pediatric mental health through activities such as advocacy, education, entrepreneurship, philanthropy, research, and/or acts of bravery/kindness. AACAP is honored to present the 2016 Catchers in the Rye Humanitarian Award to Lisa Yang.

Ms. Lisa Yang personifies the meaning of the word “humanitarian,” with her philanthropy and years of advocacy for mental health issues and creating meaningful lives for people with “invisible” disabilities. She passionately believes the seamless transition from education and research to treatment, support, and acceptance of people with disabilities is what truly makes us better human beings. Lisa also serves on the boards of the Philadelphia History Museum and the Devereux Foundation, the Cornell University Trustee Council, and the Cornell School of Industrial and Labor Relations Dean’s Advisory Council, and the Leadership Board of the McGovern Institute for Brain Research at the Massachusetts Institute of Technology. She started her career in investment banking on Wall Street but has since retired. She was born in Singapore and received an MBA from Columbia University and a BS from Cornell University.

I am truly humbled to be honored by the American Academy of Child and Adolescent Psychiatry as the recipient of the 2016 Catchers in the Rye Humanitarian Award. I do not work alone to ensure basic mental health for all, especially the young and the vulnerable. Collectively, we can make our schools, neighborhoods, and cities safer and be the catchers if “they start over the cliff.”
The AACAP Catchers in the Rye Award to an Individual was established in 1996 to recognize an individual for his or her outstanding advocacy efforts on behalf of children and adolescents. AACAP is honored to present John E. Schowalter, MD, with the 2016 Catchers in the Rye Award to an Individual.

Dr. John E. Schowalter graduated from the University of Wisconsin School of Medicine in 1960 and received its 2014 Distinguished Alumnus award. His child psychiatry training and career were at the Yale Child Study Center, where he was residency training director for 27 years, specialized in the care of adolescents, was the first Albert J. Solnit professor, and served as the department’s interim chair. He was president of five national organizations, including the American Academy of Child and Adolescent Psychiatry from 1989–1991.

For AACAP, he led its efforts to change the specialty’s name from “Child Psychiatry” to “Child and Adolescent Psychiatry,” to obtain the Accreditation Council for Graduate Medical Education’s approval for a combined 5-year residency in pediatrics, psychiatry, and child psychiatry, and to establish and cultivate AACAP’s active community of Life Members (now known as the “Owls”). His focus with the Life Members has been on engaging our leaders in nurturing and mentoring medical students and child and adolescent psychiatry residents. He continues to encourage the Life Members to support travel scholarships to the AACAP Annual Meeting and, to date, they have awarded grants to 78 medical students and 92 child and adolescent psychiatry residents.

I first brought the Catchers in the Rye Award quote to the New York Hilton as the preface for my 1989 presidential address of the same name. There was, of course, no group of “Catchers awards” until later. I am more than grateful to have now received two Catchers awards. Many, many thanks!
AACAP Catchers in the Rye Award to an AACAP Component
Membership Committee

The AACAP Catchers in the Rye Award to an AACAP Component was established in 1996 to recognize an AACAP committee for their outstanding efforts on behalf of children and adolescents. This year's award recognizes the Membership Committee, chaired by Rama Rao Gogineni, MD, and David Kaye, MD.

The Membership Committee (MC) is responsible for the recruitment, retention, and credentialing of AACAP members. For the past five years, AACAP has experienced steady and strong membership growth. From strong membership numbers to increased communication and participation with committees, the effort, energy, and leadership from the Membership Committee has been exceptional.

AACAP membership numbers continue to flourish. 2016 is our best membership year ever, now standing strong at over 9,200 members. Through the efforts of the committee, this year we also welcome 75 new Distinguished Fellows into our ranks. Success like this does not happen without expert commitment and leadership, as best exemplified by Membership Committee co-chairs David Kaye, MD, and Rao Gogineni, MD, along with the rest of the dedicated members of the committee. In addition, the committee has volunteered to work on special projects and make contacts as needed to promote membership. The MC has coordinated with the Assembly, ROCAPs, and numerous AACAP committees to promote membership and their special needs. The results have been a wonderful working relationship with many committees, including Diversity and Culture, Early Career Psychiatrists, Ethics, International Relations, Life Members, Medical Students and Residents, and Member Benefits. In addition, the committee has been instrumental in fostering positive relationships with training directors and program coordinators.

It is with profound appreciation and gratitude that we accept this honor on behalf of the members of the Membership Committee (MC). We are grateful to AACAP presidents Greenhill, Drell, Joshi, and Fritz and assembly chairs Ng and Borer for their support of the activities of the MC. The real heroes of the MC are AACAP’s Member Services team made up of Rob Grant, Nicole Creek, Nelson Tejada, Stephanie Chou, and Samantha Phillips, who worked tirelessly to promote membership so that AACAP is the strongest it’s ever been.
The AACAP Catchers in the Rye Award to a Regional Organization was established in 1996 to recognize a regional organization for their outstanding advocacy efforts on behalf of children and adolescents. AACAP is honored to present the North Carolina Council for Child and Adolescent Psychiatry with the 2016 Catchers in the Rye Award to a Regional Organization.

The North Carolina Council of Child and Adolescent Psychiatry receives its award during the Assembly of Regional Organizations on Tuesday, October 25, from 8:00 am–4:00 pm.

From its inception in the 1980s, the NCCCAP has been dedicated to improving the treatment of children and adolescent within North Carolina. Early efforts centered on recruiting trainees to participate in AACAP through the NCCCAP Marc Amaya Award, Member-in-Training Initiative, the Resident Poster Award Program (Kaye McGinty, MD), and early career psychiatrist AACAP advocacy grant (Ana Carla Smith, MD). They have been active in promoting advocacy through their presence in state legislative discussions focused on child mental health. NCCCAP council members have been active in AACAP initiatives such as Practice Parameters development and the Disaster and Trauma Issues Committee (Allan Chrisman, MD, co-chair).

From its early founders has come a literal legacy of child mental health advocacy with offspring inspired by their parents’ example as a vehicle for ongoing child mental health advocacy and service. In NC, more than a few child psychiatrists are the children of psychiatrist leaders of the past. Dr. Amba Jonnalagadda, much like her father before her, is carrying on the sentiment of putting service, community, and children first. In 2013, as medical director, she developed an anti-bullying initiative with her coworkers at Eastpointe managed care organization to serve 12 counties in eastern NC. This work has expanded from schools into trainings in the community, creating outcomes to create a successful template for redevelopment to fit different social systems nationally.

The NCCCAP is proud to accept this year’s Catchers in the Rye Award to a Regional Organization as fuel for all its efforts and hopes over many decades to come.
AACAP Virginia Q. Anthony Outstanding Woman Leader Award
Gabrielle A. Carlson, MD

The AACAP Virginia Q. Anthony Outstanding Woman Leader Award is awarded by AACAP’s president. It was established in 2013 to celebrate the lifetime achievements of extraordinary women in the field of child and adolescent psychiatry. As its namesake envisioned, the award is for women who have applied their talent, medical skills, and leadership to dramatically improve the wellbeing of children with mental illness. AACAP is honored to present the 2016 AACAP Virginia Q. Anthony Outstanding Woman Leader Award to Gabrielle A. Carlson, MD.

Dr. Gabrielle A. Carlson has been professor of Psychiatry and Pediatrics at SUNY Stony Brook since 1985. She founded and directed the Division of Child and Adolescent Psychiatry until 2013. A graduate of Cornell University Medical College, she trained at Washington University in St. Louis, the National Institute of Mental Health, and completed a fellowship in child and adolescent psychiatry at University of California, Los Angeles, where she subsequently taught on the faculty. She also taught for several years at the University of Missouri before moving to Stony Brook.

Dr. Carlson’s research interests have been in the phenomenology and treatment of mood disorders in children. She is past president of the International Society for Research in Child and Adolescent Psychopathology, was chair of AACAP’s Program Committee from 2011–2014, and serves on AACAP’s Council. She has won numerous professional awards but is proudest of the Virginia Q. Anthony Outstanding Woman Leader Award!

I thank the Academy for this extraordinary award and Ginger Anthony for making the award possible. I can’t think of an honor of which I could be more proud. I hope I can continue to live up to all that it implies for women, for child and adolescent psychiatrists, and for the trainees and families we serve.

Dr. Carlson receives her award during the Karl Menninger, MD, Plenary on Wednesday, October 26, from 8:00 am–9:45 am.
The AACAP Sidney Berman Award for the School-Based Study and Treatment of Learning Disorders and Mental Illness acknowledges outstanding leadership in the public education and treatment of learning disabilities. Albert Abramson, president of the Abramson Family Foundation, established this award in 1996 as a tribute to founding member and AACAP Past President (1969–71) Sidney Berman, MD.

Dr. Shashank V. Joshi is associate professor and director of training in child and adolescent psychiatry and director of school mental health at Stanford University. Dr. Joshi completed combined training in pediatrics, general psychiatry, and child and adolescent psychiatry at the Albert Einstein College of Medicine in New York City.

He has been the recipient of numerous awards in teaching and public service, including an Unsung Hero Award for his work in suicide prevention from the Santa Clara County, CA Mental Health Board in 2012. Dr. Joshi’s scholarly work focuses on interprofessional collaboration, cultural aspects of pediatric health, and suicide prevention in school settings. He is co-editor of the recent book Partnerships for Mental Health: A Guide to Community and Academic Collaboration, Springer, 2015.

I am so grateful to the Academy for this special honor, and to my collaborators, Carl Feinstein, Jeff Bostic, Steve Adelsheim, and Sheryl Kataoka for the opportunities they have given me to do this rewarding work.

School mental health as a career has allowed me to bridge my training in pediatrics and psychiatry with my academic interests in prevention, cultural issues, the therapeutic alliance, teaching, and structured clinical interventions.

I am especially thankful to the staff and students of the San Francisco Bay Area schools that we have been so fortunate to work with and learn from.
AACAP Cancro Academic Leadership Award
Mary W. Brown, MBA

The AACAP Cancro Academic Leadership Award recognizes a currently serving general psychiatry training director, medical school dean, CEO of a training institution, chair of a department of pediatrics, or chair of a department of psychiatry for his or her contributions to the promotion of child and adolescent psychiatry. Brooke Garber Neidich established this award in 2003 in honor of Robert Cancro, MD.

Since May 2016, Ms. Mary W. Brown has worked as a consultant and executive coach under MWB Associates LLC. Prior to this, she served as vice president for health systems and vice dean for administration at Tulane Medical School in New Orleans. In this capacity, she was responsible for the administrative and financial oversight of this private university's medical school, supporting 700 medical students and 300 residents and fellows. Before working for Tulane in 2007, Mary worked in health care management and consulting, specializing in strategic planning and financial turnarounds for hospital systems. She brought 20 years of hospital administration experience to this consulting practice. Mary currently serves on the board of a charter school management organization in New Orleans. She holds a BA from Williams College in Massachusetts and an MBA from the Wharton School at the University of Pennsylvania.

I am deeply touched to receive the Academy’s Cancro award. There is such an overwhelming need in our country for easily accessible mental health treatment, especially for children. I am grateful that I could help Tulane’s excellent care providers reach a few more children in distress. Thank you for the recognition of this particular work, but know, in the end, it is a reflection of the healing work you all do.

Ms. Brown presents “Necessity: The Mother of Invention” during the Training and Education Lunch on Friday, October 28, from 11:30 am–2:00 pm.
The Klingenstein Third Generation Foundation Award for Research in Depression or Suicide recognizes the best paper published in the Journal of the American Academy of Child and Adolescent Psychiatry on depression and/or suicide, written by a child and adolescent psychiatrist, and published between July 2015 and June 2016. The award is supported by the Klingenstein Third Generation Foundation, which established this award in 1999.

Dr. Joan L. Luby is the Samuel and Mae S. Ludwig Professor of Psychiatry (Child) at Washington University School of Medicine in St. Louis. She is the founder and director of the Washington University School of Medicine Early Emotional Development Program (EEDP). Dr. Luby’s research focuses on preschool mood disorders, particularly depression, its clinical characteristics, biological markers, and associated alterations in brain and emotional development in young children with depressive syndromes. In addition, treatment development that focuses on early psychotherapeutic intervention, sensitive periods, and neural markers of change is also a key area of focus. Dr. Luby’s contributions include establishing the criteria for identification, validation, and early intervention in depressive syndromes in the preschool age group as well as studies in humans showing the effect of parental nurturance and early experiences of poverty on brain development. Among her honors are the NARSAD Gerald Klearman award for outstanding research and the AACAP Irving Philips award for prevention. Dr. Luby has published extensively in numerous general and child psychiatric journals and serves on a number of editorial boards.

I am so honored to have my work and that of my collaborators recognized by the Klingenstein Third Generation Foundation. This is a very meaningful acknowledgment.
The AACAP Elaine Schlosser Lewis Award is given annually for the best paper published in the Journal of the American Academy of Child and Adolescent Psychiatry, written by a child and adolescent psychiatrist, and published between July 2015 and June 2016. The award was established in 1994 and is supported by the Elaine Schlosser Lewis Fund, a fund named in honor of the late mother of AACAP member Owen Lewis, MD, a special education teacher and child advocate.

Dr. Robert Milin graduated from the Faculty of Medicine at the University of Ottawa, where he completed his residency training in psychiatry. He then went on to complete dual fellowships in child and adolescent and addiction psychiatry. He is currently head of the Division of Addiction and Mental Health and associate professor at University of Ottawa, Department of Psychiatry. Clinically he serves as the director of the Adolescent Day Treatment/School Unit, Youth Psychiatry Program at the Royal Ottawa Mental Health Centre. Dr. Milin is a clinical scientist with the University of Ottawa, Institute of Mental Health Research, and his research interests have focused on adolescent substance use disorders, early-onset major psychiatric disorders in youth, and more recently youth mental health awareness and stigma. He has given over 200 peer-reviewed and invited presentations on his clinical research work and expertise. He has served on numerous national and international professional academy committees including the American Psychiatric Association Council on Addiction Psychiatry and the AACAP Substance Abuse Committee, and serves on the board of directors of the American Academy of Addiction Psychiatry.

Our article “Impact of a Mental Health Curriculum on Knowledge and Stigma Among High School Students: A Randomized Controlled Trial” is the first study of its kind to provide evidence of the benefit of mental health education as given by teachers in reducing stigma and improving attitudes towards mental illness among high school students enrolled in their classes. The study also benefits from an eloquent editorial written by Dr. Bernice A. Pescosolido. I wish to thank the Academy for honoring our work and express our gratitude for the recognition of this work by the Elaine Schlosser Lewis Award.
The Irving Philips Award recognizes a child and adolescent psychiatrist and AACAP member who has made significant contributions in a lifetime career or single seminal work to the prevention of mental illness in children and adolescents. The award is named after former AACAP President Irving Philips (1985–1987), who was renowned for his work in the field of prevention.

Dr. Frank W. Putnam graduated from Wesleyan University in 1969, majoring in psychology and biology. He received a master’s degree in neuroscience and his MD in 1975 from Indiana University. Following an internship, he completed a residency in adult psychiatry at Yale University in 1979 and began a clinical research fellowship at the National Institute of Mental Health in Bethesda, MD.

In 1999, he co-founded the Center for Safe and Healthy Children at Cincinnati Children’s Hospital, dedicated to forensic evaluation, treatment, and prevention of child maltreatment. In addition, he served as scientific director of Every Child Succeeds, a regional home-visiting, child abuse prevention program for first-time poor young mothers.

Diagnosed with stage-4 cancer and no longer able to travel, Dr. Putnam continues to work from home on prevention and treatment projects.

*It is amazing how much you can accomplish when it doesn’t matter who gets the credit.*
—Harry S. Truman
Dr. Sergio V. Delgado presents “Two-Person Relational Psychotherapy of a High School-Age Adolescent: Integrating Intersubjectivity and Neuroscience in Clinical Work” during Honors Presentation 2 on Wednesday, October 26, from 4:00 pm–4:50 pm.

The AACAP Rieger Psychodynamic Psychotherapy Award, supported by the Norbert and Charlotte Rieger Foundation, recognizes the best published or unpublished paper written by a member of AACAP. The winning paper addresses the use of psychodynamic psychotherapy in clinical practice and fosters development, teaching, and practice of psychodynamic psychotherapy in child and adolescent psychiatry.

Dr. Sergio V. Delgado is a graduate of the Karl Menninger School of Psychiatry. He completed his training as a supervising and training analyst at the Topeka Institute for Psychoanalysis. Currently he is an adult and child supervising and training analyst at the Cincinnati Psychoanalytic Institute, and he is the medical director of outpatient psychiatry at Cincinnati Children’s Hospital.

Dr. Delgado is president of AACAP’s Cincinnati-Dayton Regional Council. He actively teaches in the adult and child psychiatry training programs and is director of psychotherapy for the child and adolescent training program. Dr. Delgado is a strong advocate for the integration of individual psychotherapy, family psychotherapy, and psychopharmacologic interventions in the treatment of patients and is the founder of the relational advanced psychotherapy program. He has authored two books, Difficult Psychiatric Consultations and Contemporary Psychodynamic Psychotherapy: Integrating Intersubjectivity and Neuroscience, used in Cincinnati training programs.

Thank you to the Academy and the Rieger Foundation for this wonderful and humbling honor. I also want to thank my patients, who helped me become a better psychotherapist and a better teacher to our young trainees. I hope we continue to embrace the findings from developmental research, neuroscience, and intersubjectivity, to extoll the importance of the implicit and the nonverbal in the human interactions that lead to change. Ultimately co-construction of new reparative emotional experiences is fundamental to the healing process and the development of new neuronal pathways.
The AACAP Norbert and Charlotte Rieger Award for Scientific Achievement recognizes the best paper published in the Journal of the American Academy of Child and Adolescent Psychiatry from July 2015–June 2016. Established in 1988, the award is supported by the Norbert and Charlotte Rieger Foundation.

Dr. Charles H. Zeanah, Jr. is the Mary Peters Sellars-Polchow Chair in Psychiatry, Professor of Psychiatry and Pediatrics, and Vice-Chair for Child and Adolescent Psychiatry in the Department of Psychiatry and Behavioral Sciences at the Tulane University School of Medicine in New Orleans. He also directs the Institute of Infant and Early Childhood Mental Health at Tulane. Dr. Zeanah is a distinguished fellow of AACAP, a distinguished life fellow of the American Psychiatric Association, and a board member of Zero to Three. Throughout his career, he has studied the effects of adverse early experiences on children's development and interventions designed to enhance their recovery. He is the editor of three editions of the Handbook of Infant Mental Health and, with Charles Nelson and Nathan Fox, the co-author of Romania’s Abandoned Children: Deprivation, Brain Development and the Struggle for Recovery and is the author of more than 300 scientific publications.

My co-authors and I are grateful for this prestigious award. Chuck Nelson, Nathan Fox, and I have led this project for 15+ years. Our research team in Romania, many colleagues there and in the US have made this work possible. Kate Humphreys, a former postdoc at Tulane (now at Stanford), is first author on the paper and has been an invaluable contributor to the Bucharest Early Intervention Project. Lucy McGoron, as a graduate student at University of New Orleans, assisted with data analysis and write-up. Finally, thanks to Tom Anders and Greg Fritz, mentors who taught me child psychiatry and nurtured my academic interest in early experiences.
The AACAP Norbert and Charlotte Rieger Service Program Award for Excellence recognizes innovative programs that address prevention, diagnosis, or treatment of mental illnesses in children and adolescents and serve as model programs to the community. Supported by the Norbert and Charlotte Rieger Foundation, the award was established in 1996.

Dr. Lisa Ann Durette graduated with honors from Agnes Scott College with degrees in chemistry and French and matriculated to the University of South Carolina, where she completed her medical school training. She then attended the Medical University of South Carolina’s general psychiatry residency training program and child and adolescent fellowship training program.

With Dr. Ken McCay and her husband, Dr. Durette founded the clinic Healthy Minds, which was chosen to be the site of a pilot project with Clark County’s Department of Family Services for treating youth in foster care, which led to legislative changes and allowed for continued funding of its treatment model. To date the program has reduced hospitalization rates, use of psychotropic medications, and placement disruptions, helping to improve the clinical outcomes for over 800 youth.

Alone we can do so little; together we can do so much.
—Helen Keller

Dr. Durette presents “Leveraging Partnerships to Strengthen Local Child and Adolescent Psychiatry Resources and to Improve Outcomes” during Honors Presentation 4 on Thursday, October 27, from 8:30 am–9:20 am.
The AACAP Jeanne Spurlock Lecture and Award for Diversity and Culture recognizes individuals who have made outstanding contributions to the recruitment of child and adolescent psychiatry from all cultures. This award was established in 2002 in honor of Jeanne Spurlock, MD, a giant in child and adolescent psychiatry and in advocacy for children, adolescents, and their families from all cultures.

Dr. Cheryl S. Al-Mateen is a graduate of Howard University and the Howard University College of Medicine. Dr. Al-Mateen completed her psychiatry residency and child psychiatry fellowship at Hahnemann University in Philadelphia. She is board certified in general psychiatry, child and adolescent psychiatry, and forensic psychiatry. She is a distinguished fellow of both AACAP and the American Psychiatric Association. Since completing her training, Dr. Al-Mateen has worked at the Virginia Commonwealth University (VCU) School of Medicine in Richmond, VA in various capacities. Currently, she is professor of psychiatry and pediatrics and clerkship director for psychiatry at VCU School of Medicine. Dr. Al-Mateen teaches students, residents, and fellows as well as trainees in social work and psychology. In addition, she teaches content related to trauma and to health disparities/cultural competency to M1 and M2 students. Dr. Al-Mateen also serves as the interim medical director for the Virginia Treatment Center for Children and as co-chair of AACAP’s Diversity and Culture Committee. Dr. Al-Mateen has presented and written on topics including culture and the effects of violence and trauma regionally, nationally, and internationally.

I remember what seemed to be Mama Jeanne’s question for every discussion: What about the children? This directly informs my day-to-day actions, even now.
The AACAP George Tarjan, MD, Award for Contributions in Developmental Disabilities recognizes a child and adolescent psychiatrist and AACAP member who has made significant contributions in a lifetime career or single seminal work to the understanding or care in the field of intellectual and developmental disabilities. The award was established in 1993 in honor of AACAP Past President (1977–79) George Tarjan, MD, by his wife, Mrs. George Tarjan, and friends.

Dr. James T. McCracken attended Baylor College of Medicine and completed residency training at Duke University before moving to the University of California, Los Angeles (UCLA), where he received clinical and research training in child psychiatry. Dr. McCracken is the Joseph Campbell Professor of Child Psychiatry at the David Geffen School of Medicine at UCLA, where he serves as director of the Division of Child and Adolescent Psychiatry in the Department of Psychiatry and director of the Child and Adult Neurodevelopmental Clinic, which he founded.

Dr. McCracken traces his initial involvement in autism research back 20 years to family studies with colleagues Susan Smalley and Peter Tanguay, identifying elevated rates of mood/anxiety disorders in family members of individuals with autism. His current research is focused on identifying new treatments and treatment biomarkers for a range of childhood cognitive and neurodevelopmental disorders.

I am deeply honored to receive the 2016 George Tarjan, MD, Award from my peers in the Academy. As a young faculty member, I had the privilege to witness the humanity and wisdom George would exude when he attended our faculty meetings in his retirement, and I daily walk the halls in the building he built. I am committed to continuing his incredible legacy by ensuring child psychiatry remains devoted to providing the best and most humane care for all individuals with disabilities, and to identifying treatments that maximize their potential as individuals.
AACAP Simon Wile Leadership in Consultation Award
L. Read Sulik, MD

The AACAP Simon Wile Leadership in Consultation Award acknowledges outstanding leadership and continuous contributions in the field of consultation-liaison child and adolescent psychiatry. The award is named after Simon Wile, MD, a renowned pediatrician and a lifelong supporter of child and adolescent psychiatry, and it was established in 2003 with a donation from the Massachusetts General Hospital.

A graduate of the University of Minnesota Medical School, Dr. L. Read Sulik completed his triple board residency at the University of Kentucky. Dr. Sulik is the chief integration officer and executive director for PrairieCare in Minnesota, where he leads the Integrated Health and Wellness Clinics. He is also involved in delivery innovation, education, and research and sees patients in integrated health clinics. Previously Dr. Sulik served as the assistant commissioner of the Minnesota Department of Human Services over Chemical and Mental Health Services. Dr. Sulik continues to lecture extensively on children's mental health, integrated health care, and leadership. He loves most being with his incredible wife and amazing three teenage and young adult children, whether hiking, traveling, or cooking together.

After many years and numerous attempts to develop integrated health care programs, it is an honor to receive the Simon Wile Leadership in Consultation Award. When I completed the triple board program, I did not know what collaborative, integrated, or shared care was. I impulsively started my child and adolescent psychiatry practice in the pediatric clinic working alongside the pediatricians because . . . it made sense. Today we have a responsibility to work with our health care partners to advance integrated health care to transform the lives we serve together because . . . it makes sense!

Dr. Sulik presents “Transforming Health and Wellness Through Dynamically Integrated Health Care: A Big Solution to Health Care’s Big Problems” during the Simon Wile Symposium, on Thursday, October 27, from 2:00 pm–5:00 pm.
AACAP New Distinguished Fellows

AACAP congratulates the following members elevated to Distinguished Fellows between October 1, 2015 and October 1, 2016.

Khalid I. Afzal, MD—Hickory Hills, IL
Lisa Amaya-Jackson, MD, MPH—Durham, NC
Alka Aneja, MD—San Ramon, CA
Renu Anupindi, MD—Austin, TX
Dana Arlien, MD—Reno, NV
Julie Balaban, MD—Lebanon, NH
Sharon E. Cain, MD—Kansas City, KS
Richard F. Camino Gaztambide, MD, MA—Macon, GA
Lee Carlisle, MD—Tacoma, WA
Daniel Connor, MD—Farmington, CT
Sergio V. Delgado, MD—Cincinnati, OH
Robert Dicker, MD—New Hyde Park, NY
Daniel P. Dickstein, MD—East Providence, RI
William Dikel, MD—Minneapolis, MN
Susan Donner, MD—Woodland Hills, CA
Julius Earle, MD—Greenville, SC
Ken Ensroth, MD—Oregon City, OR
Jean A. Frazier, MD—Boston, MA
Daniel A. Geller, MD—Newton, MA
Jaswinder Ghuman, MD—Sewickley, PA
Lisa Giles, MD—Salt Lake City, UT
Kevin M. Gray, MD—Charleston, SC
Rosalie Greenberg, MD—Summit, NJ
Katherine Grimes, MD, MPH—Cambridge, MA
Jennifer O. Hagman, MD—Aurora, CO
Usman Hameed, MD—Hummelstown, PA
Stephanie Hartselle, MD—Pawtucket, RI
Emmeline Hazaray, MD—Northbrook, IL
Claudine Higdon, MD—Glen Oaks, NY
Michelle S. Horner, DO—Ellicott City, MD

Inaugural AACAP E. James Anthony, MD, IACAPAP Presidential Travel Award
Bruno Falissard, MD, PhD

The AACAP E. James Anthony, MD, IACAPAP Presidential Travel Award was created to honor E. James Anthony, MD, AACAP president from 1981–1983, and help support the travel expenses for the president of the International Association for Child and Adolescent Psychiatry and Allied Professionals (IACAPAP) to attend AACAP’s Annual Meeting. This award was established in 2015 through the generosity of Virginia Q. Anthony and other donors and serves as a lasting legacy to Dr. Anthony’s commitment to building a stronger international community.

International Association for Child and Adolescent Psychiatry and Allied Professions (IACAPAP) President

After some initial training in mathematics and fundamental physics (Ecole Polytechnique, Paris), Dr. Bruno Falissard engaged in medical studies and specialized in psychiatry in 1991. His PhD was in biostatistics (interim analyses in clinical trials, 1990), and his post doc was in psychometrics and exploratory multidimensional methods. He was assistant professor in child and adolescent psychiatry in 1996–1997, associate professor in public health between 1997–2002, and full professor in public health since 2002. He heads the Master in Public Health of South-Paris University (600 students) and a research unit, Mental Health and Public Health (140 members). He is co-author of 380 papers and author of 4 books. He has clinical activity in child and adolescent psychiatry (consultation). Since 2015, he has been the president of IACAPAP.

Thank you for this kind award. I am excited about the meeting and very much looking forward to working with my American colleagues.
The AACAP Paramjit Toor Joshi, MD, International Scholar Awards recognize international physicians who have shown a commitment, early in their careers, for the enhancement of mental health services for children, adolescents, and their families. The award was established in 2015 with a donation from AACAP Past President Paramjit Toor Joshi, MD.

Dr. Olurotimi Adejumo had his undergraduate medical training at the University of Ibadan in Nigeria, commenced his psychiatry residency training, obtained postgraduate general psychiatry qualifications in the West African College of Physicians and National Postgraduate Medical College of Nigeria, worked briefly as a general psychiatrist, and then returned to study for an MSc in Child and Adolescent Mental Health at the University of Ibadan. During his studies, he became one of the first two child psychiatrists trained within his country.

Dr. Adejumo has conducted research into psychiatric disorders among youth populations over the years. Seeking to develop research expertise, he obtained an MSc in Clinical Investigation at Northwestern University between 2014 and 2015 and is currently pioneering a longitudinal study of cognitive, emotional, and behavioral problems among children and adolescents with HIV in Nigeria, alongside a team of researchers in the United States and Nigeria.

Apart from his clinical work in primary and tertiary psychiatry settings, Dr. Adejumo currently serves as associate faculty at the Centre for Child and Adolescent Mental Health (CCAMH), University of Ibadan, where he teaches and conducts research, mostly involving the interface between mental and physical health in children and adolescents. His career objectives include acquiring the best training possible and contributing significantly to mental health care through evidence-based clinical practice and high-quality research.

Thank you for this award. I aim to become a skilled child psychiatrist and researcher to give back to mental health care in my country through evidence-based clinical practice, training, and high-quality research.
Dr. Matías Irarrázaval is a child and adolescent psychiatrist from Chile and an assistant professor in the Department of Psychiatry at the University of Chile. He earned a Master of Public Health from Harvard School of Public Health and did a postdoctoral research fellowship at the Judge Baker Children’s Center.

His research interests fall mainly in the field of prevention of mental disorders and early interventions in mental health, with a global health perspective.

He is the principal investigator of several projects that aim to adapt and implement preventive and early interventions for families with parental depression, adolescents with suicide risk, and children with autism. He directs the evaluation and implementation of the mental health component of “Chile Grows With You” (CCC), a comprehensive early childhood promotion and prevention system that aims to promote healthy child development and reduce health inequalities in Chile.

The National Council on Early Childhood has valued his research work and used it to extend mental disorder prevention to all children and adolescents up to 18 years old—more than 2.5 million—which has transformed this initiative into the largest mental health promotion and prevention program in Latin America.

He is a consultant for the Ministry of Health and the National Service for Prevention and Rehabilitation of Drugs and Alcohol.

Among other recognitions, he has received the RedeAmericas Research Developmental Career Award, the Millennium Institute for Research on Depression and Personality Early Career Research Award, and the International Association for Child and Adolescent Psychiatry and Allied Professions Donald Cohen Fellowship.

Thank you for this award. Attending AACAP’s Annual Meeting will stimulate my professional development and broaden my opportunity to collaborate with colleagues. This can certainly improve my ability to accomplish my goals.
The AACAP Ülkü Ülgür, MD, International Scholar Award recognizes an AACAP member in the international community who has made significant contributions to the enhancement of mental health services for children and adolescents. The award was established in 2013 with a donation from AACAP member Ülkü Ülgür, MD.

Dr. Bahar Gökler received her medical degree from Ankara University School of Medicine in 1973, completed her psychiatry residency training at Hacettepe University in 1978, became an associate professor of child and adolescent psychiatry in 1985, and received her professorship in 1994.

She served as the chair of the child and adolescent psychiatry department at Hacettepe University Medical School between 1995–2011. She is a founding member of the Turkish Association of Child and Adolescent Mental Health and served as the chief editor of the Journal of Child and Adolescent Mental Health for 20 years.

She has been a member of the Turkish Medical Association Honor Committee and served as the representative of Turkey in the European Union of Medical Specialists (UEMS) Section of Child and Adolescent Psychiatry/Psychotherapy for two terms starting in 1998.

Since 2013, she has been the president of the Turkish Association for the Prevention of Child Abuse and Neglect. In collaboration with her colleagues, she has developed and extended the delivery of a comprehensive training program on child abuse and neglect for child and adolescent psychiatrists and other mental health professionals across the country.

Dr. Gökler retired in 2011 and set up her private practice at Ardiç Mental Health Center. She has been participating in research, training, and social responsibility projects as a researcher, consultant, or trainer. She has several national and international publications.

My sincere appreciation for this meaningful and prestigious award.
Members of the 100% Club

The following child and adolescent psychiatry residency program directors recruited all of their residents to be members of AACAP. Since child and adolescent psychiatry residents are the future of both AACAP and the field of child and adolescent psychiatry, AACAP acknowledges and warmly thanks the following residency program directors for their support. All of their residents have become AACAP members as of October 1, 2016.

The Center for Mental Health Services (CMHS)–AACAP Fellow was designed to familiarize a child and adolescent psychiatry resident with public-sector service and community-based child and adolescent psychiatry policy and practice. Applications are taken from residency programs within the Washington, DC area. The fellow works one day a week at CMHS, thereby receiving an introduction into the operation of the federal government, including the participation in federal and state programs for children who have mental health challenges. Additionally, the fellow automatically serves on AACAP’s Committee on Community-Based Systems of Care.

Dr. Milangel T. Concepcion Zayas was born and raised in Puerto Rico. She obtained her degree in epidemiology at the University of Puerto Rico, Graduate School of Public Health, and her medical degree from University of Puerto Rico School of Medicine. Her work with pediatric HIV community research and her volunteer work in HIV/hepatitis C virus harm reduction with the homeless and in diverse international health missions were fuel for her to work with children’s mental health. Dr. Concepcion later moved to Washington, DC for psychiatry residency training and a child and adolescent psychiatry fellowship at Georgetown University Hospital and Children’s National Medical Center. During her training, under the firm belief that mental health should be accessible to all and thanks to the guidance of leading clinicians and mentors, she started working on educational projects for health providers on topics of global mental health, child trafficking, and unaccompanied immigrant children from Central America.

As Desmond Tutu said, “At times of despair we must learn to see with new eyes.” Muchas gracias to the children and families who teach me every day. Muchas gracias to my wonderful mentors along the path who motivated me with their example, but especially to my mentors at Children’s National Medical Center for your constant support in pursuing some of my dreams through the endeavor of this amazing fellowship from Day 1! Thank you AACAP/CMHS/SAMHSA for materializing a dream of collaborating while learning from the public mental health sector and systems of care. It feels good to be part of this team! It has been a great journey.
The 2016 Systems of Care Special Program, sponsored by AACAP’s Community-Based Systems of Care Committee, provides child psychiatrists and other mental health providers with the knowledge, skills, and attitudes needed to better serve youth with substance use disorders (SUDs) and co-occurring disorders. The scholarships, funded by the Substance Abuse and Mental Health Services Administration’s Center for Mental Health Services and the Technical Assistance Network, provide honoraria for AACAP residents and fellows to learn more about providing care to children in community-based settings by offering the opportunity to participate in the Systems of Care Learning Community, which includes: mentoring by members of the Systems of Care Committee, poster presentations on systems of care topics, and attending the Special Program and other relevant Annual Meeting events.

The AACAP Beatrix A. Hamburg Award for the Best New Research Poster by a Child and Adolescent Psychiatry Resident was established in 1996 through a grant from the Greenwall Foundation and the Klingenstein Third Generation Foundation in honor of Beatrix A. Hamburg, MD, former president of the William T. Grant Foundation and an AACAP Life Fellow. This award honors her commitment to the education and development of young investigators by recognizing the best new research poster by a child and adolescent psychiatry resident and AACAP member.

Dr. Naser Ahmadi has been pursuing research on posttraumatic stress disorder (PTSD) and its related psychosomatic disorders since his preventive medicine clinical and translational research fellowship at University of California, Los Angeles (UCLA). He continued this research during his adult psychiatry residency, in which he received an APA Research Colloquium Junior Investigator Award for his study on the efficacy of electroconvulsive therapy on PTSD. As a child and adolescent psychiatry fellow at UCLA-Kern, he has been conducting translational clinical research on adverse childhood experiences (ACE) and PTSD, as well as their related psychosomatic disorders. Furthermore, he received the AACAP Psychiatry Pilot Research Award for his current project investigating the impact of positive psychiatry in comorbid attention-deficit/hyperactive disorder and PTSD. He is currently researching novel markers and interventions for early detection, risk stratification, and management of ACE and PTSD in adolescents.

I am extremely honored to receive AACAP’s 2016 Beatrix Hamburg Award. I am pleased to be a part of the flourishing field in early prevention and management of adverse childhood experiences and trauma disorders, to safeguard a healthy future for our nation. I am grateful to all my mentors at UCLA and Kern Medical for their valuable support and education.
The John F. McDermott Assistant Editor-in-Residence position provides the opportunity for an early-career child and adolescent psychiatrist to join the editorial team of the Journal of the American Academy of Child and Adolescent Psychiatry (JAACAP) for two years. Working closely with the editor-in-chief, the assistant editor-in-residence acquires an intimate understanding of the editorial processes behind the production of the Journal. The long-term goal of this position is to foster the professional growth of child and adolescent psychiatrists interested in the editorial process. The award was established in 2006 in honor of the late John F. McDermott, Jr., MD, JAACAP editor from 1988–1997.

Dr. Oliver M. Stroeh is the Clarice Kestenbaum, MD, Assistant Professor of Education and Training in the Division of Child and Adolescent Psychiatry (in Psychiatry) at Columbia University. He is also associate director of the NewYork-Presbyterian Hospital Child and Adolescent Psychiatry (CAP) Residency Training Program. Dr. Stroeh attended medical school at the Columbia University College of Physicians and Surgeons, general psychiatry residency at NewYork-Presbyterian Hospital/Columbia University/New York State Psychiatric Institute, and CAP residency at NewYork-Presbyterian Hospital. Prior to returning to Columbia University, Dr. Stroeh was assistant professor at the Vanderbilt University School of Medicine, a child and adolescent inpatient psychiatrist at the Vanderbilt Psychiatric Hospital, and director of the Vanderbilt University CAP Residency Training Program. Dr. Stroeh has interests in psychiatry training/education and psychotherapy. He is an advanced candidate at the Saint Louis Psychoanalytic Institute. Dr. Stroeh serves as the associate editor of JAACAP Connect.

I would like to express my sincere gratitude for this terrific opportunity. In particular, I would like to recognize the late Dr. Jack McDermott and to thank the incredible McDermott Assistant Editor-in-Residence family, including Drs. Andrés Martin, Schuyler Henderson, Stacy Drury, and Michelle Horner, Ms. Mary Billingsley, and Ms. Alyssa Murphy.
The AACAP Robinson-Cunningham Award for Best Paper by a Resident is named after J. Franklin Robinson, MD, and James M. Cunningham, MD, two past AACAP presidents who dedicated their lives to improving and expanding psychiatry services for children. This award recognizes an outstanding paper on some aspect of child and adolescent psychiatry started during residency and completed within three to five years of graduation.

Dr. Anjali Varigonda is a third-year resident in psychiatry at the University of Vermont Medical Center. She received her undergraduate degree from the University of California, Riverside and received her MD from the University of Vermont College of Medicine. During medical school, she became involved in AACAP’s Klingenstein Third Generation Foundation (KTGF) Medical Student Program. Through the program, she was able to connect with her research mentor Dr. Michael Bloch at the Yale Child Study Center, with whom she arranged a research elective externship during her fourth year of medical school. She conducted a series of meta-analyses using longitudinal clinical trials data to examine the time-course of selective serotonin reuptake inhibitor (SSRI) response in children with obsessive-compulsive disorder (OCD) and depression, while comparing them to the adult data. Dr. Varigonda plans to pursue a career as a clinician researcher following subspecialty training in child and adolescent psychiatry.

I am honored to have been selected for the Robinson-Cunningham Award, and extend my deepest gratitude to AACAP for their support of trainees and their strong value for mentorship. I am grateful to Dr. Michael Bloch for continuing to be such an inspiring role model and mentor to me. Lastly, I would like to thank the University of Vermont College of Medicine and Psychiatry Residency Program for nurturing me in my intellectual journey over the past six years.
The AACAP John E. Schowalter Resident Council Member honors former AACAP President John E. Schowalter, MD (1989–1991). The Resident Council Member participates in the governance of AACAP by attending Council meetings for two years (2016–2018). This position encourages those new to the field of child and adolescent psychiatry to become familiar with AACAP functions as well as the overall governance of the association and in turn gives resident members of AACAP a voice on Council.

Dr. Lan Chi Krysti Vo is a child and adolescent psychiatry fellow at Icahn School of Medicine at Mount Sinai. Dr. Vo graduated cum laude from the University of Texas in Austin and earned her MD with Distinction in Research at the University of Texas Southwestern Medical Center in Dallas, TX. She then completed her general psychiatry residency at Emory University School of Medicine. She has been involved in research and clinical work with patients with autism spectrum disorder at Marcus Autism Center and Emory Autism Center. She is committed to addressing mental health care needs through social advocacy and medical innovations.

Dr. Vo has held numerous leadership positions throughout medical school and residency. She is currently an American Psychiatric Association public psychiatry fellow.

Thank you to AACAP and Council for your willingness to invest in my professional development. I am honored and excited to contribute to the AACAP community as the next John E. Schowalter Resident Council Member.
The AACAP Junior Investigator Award, supported by AACAP’s Research Initiative, offers an award of up to $30,000 a year for two years for child and adolescent psychiatry junior faculty. Beginning in 2009, this program is intended to facilitate basic or clinical research relevant to our understanding, treatment, and prevention of child and adolescent mental health disorders.

Dr. Luis Patino Duran is a recently appointed assistant professor of clinical medicine in the Division of Bipolar Disorders Research at the University of Cincinnati’s College of Medicine. He attended medical school at the Universidad Nacional Autónoma de México, after which he completed a masters in science on clinical epidemiology at the Netherlands Institute of Health Sciences of Erasmus Universiteit Rotterdam. Upon completion he did his residency training in psychiatry and fellowship in child and adolescent psychiatry at the Instituto Nacional de Psiquiatría in Mexico. He then went on to do a postdoctoral fellowship in clinical research at the University of Cincinnati’s Department of Psychiatry and Behavioral Neurosciences. Dr. Patino Duran’s research focus has centered on pediatric bipolar disorder with special interest in biomarkers of illness progression in those with bipolar disorder and those at high risk for developing bipolar disorder. He has benefited tremendously from ongoing mentorship provided by Dr. Melissa DelBello at the University of Cincinnati’s Department of Psychiatry and Behavioral Neurosciences. He continues to practice part-time as a child psychiatrist in a community-based outpatient clinic, where he also supervises residents and fellows.

Dr. Patino Duran presents “Exploratory Pharmacogenetic Study of Lithium Response in Adolescent Acute Mania” during New Research Poster Session 5 on Friday, October 28, from 9:30 am–12:00 pm.
AACAP Pilot Research Awards for General Psychiatry Residents, supported by Pfizer and PhRMA

2015 Recipients:

Kathryn K. Ridout, MD, PhD
Brown University
Project: Association Between Molecular Markers of Neuroendocrine Function and Cellular Metabolism With Early Life Stress and Psychopathology
Mentor: Audrey R. Tyrka, MD, PhD

Dr. Ridout will also receive a Special AACAP Award for Best New Research Poster by a General Psychiatry Resident.

Gerrit Ian van Schalkwyk, MBChB
Yale University Child Study Center
Project: Social Media Use Improves Friendship Quality in Adolescents With Autism Spectrum Disorder
Mentor: Fred R. Volkmar, MD
AACAP Pilot Research Award for Attention Disorders, supported by AACAP's Elaine Schlosser Lewis Fund

2015 Recipients:

Heather M. Joseph, DO
Western Psychiatric Institute and Clinic of the University of Pittsburgh Medical Center
Project: Familial Transmission of Attention-Deficit/Hyperactivity Disorder: A Pilot Study of Fathers With Attention-Deficit/Hyperactivity Disorder and Their Young Children
Mentor: Brooke S.G. Molina, PhD
This award was partially supported by the Sy Syms Foundation.
AACAP Pilot Research Awards for Junior Faculty and Child and Adolescent Psychiatry Fellows, supported by AACAP’s Campaign for America’s Kids and the AACAP Endowment

2015 Recipients:

**Daniel Medeiros Almeida, MD**
Cincinnati Children’s Hospital Medical Center
Project: *Long-Chain Omega-3 Fatty Acid Biostatus and Hippocampal Function in Adolescent Depressive Disorders*
Mentor: Robert K. McNamara, PhD

**Mirjana Domakonda, MD**
Columbia University Medical Center and New York State Psychiatric Institute
Project: *Attentional Bias to Food Cues and Frontostriatal Circuit Function in Adolescents With Bulimia Nervosa*
Mentor: Rachel Marsh, PhD

**Carolina Vidal, MD, MPH**
Johns Hopkins University
Project: *Underlying Mechanisms of Perceived Social Status and Negative Affect in Adolescents*
Mentor: Lawrence Wissow, MD, MPH
The AACAP Educational Outreach Program provides the opportunity for child and adolescent psychiatry residents to receive a formal overview of child and adolescent psychiatry, establish mentor relationships with child and adolescent psychiatrists, and experience AACAP’s Annual Meeting. Supported by the AACAP Endowment, recipients receive up to $1,000 of financial assistance to attend AACAP’s Annual Meeting and must obtain a minimum of $300 of shared funding from a regional organization or institution.

Margaret R. Woodbury, BS—University of Maryland
AACAP Jeanne Spurlock Research Fellowship in Substance Abuse and Addiction for Minority Medical Students, supported by the National Institute on Drug Abuse (NIDA), and AACAP’s Campaign for America’s Kids

The AACAP Jeanne Spurlock Research Fellowship in Substance Abuse and Addiction, supported by the National Institute on Drug Abuse (NIDA) and AACAP’s Campaign for America’s Kids, is named in honor of Jeanne Spurlock, MD, in recognition of her lifetime of opening doors for colleagues from diverse backgrounds and fostering career advances. The summer fellowships encourage outstanding minority students to pursue careers in substance abuse and addiction research in child and adolescent psychiatry. The fellowships are administered through AACAP’s Research, Training, and Education Department and the AACAP Substance Abuse and Addiction Committee, under the direction of Kevin M. Gray, MD, and Catherine A. Martin, MD.

Joseph M. Aloi, BS
Boys Town National Research Hospital Omaha
Project: Differential Patterns of Dysfunctional Punishment Processing in Adolescents With Substance Use Disorders and Disruptive Behavior Disorders
Mentor: James Blair, PhD

Kristen Kim, BA
Rutgers University
Project: Reward Prediction Error in Drug-Naïve Youth At-Risk for Substance Abuse
Mentor: Iliyan Ivanov, MD (Icahn School of Medicine at Mount Sinai)

Olivetta N. Uradu, BS
Howard University
Project: Mental Health and Behavioral Changes in Children of Addicted Parents
Mentor: Emmanuel Eze, MD
The AACAP Summer Medical Student Fellowships, supported by AACAP’s Campaign for America’s Kids, offer an opportunity for medical students to explore a career in child and adolescent psychiatry, gain valuable work experience, and meet leaders in the field of child and adolescent psychiatry. The fellowship opportunity provides up to $3,500 for 12 weeks of clinical or research training under a child and adolescent psychiatrist mentor. The fellowships are administered through AACAP’s Research, Training, and Education Department and the AACAP Training and Education Committee, under the direction of Jeffrey I. Hunt, MD, and Howard Y. Liu, MD.

Dallas Argueso, BS
Children’s Hospital of Philadelphia
Project: Sex Differences in Weight Restoration and Quality of Life After Family-Based Treatment of Children and Adolescents With Restrictive Eating Disorders
Mentors: Laurel Weaver, MD, PhD
Rebecka Peebles, MD
Mr. Argueso’s award was partially supported by the Ruth and Peter Metz Family Foundation.

Diana J. Back, BS
University of Minnesota
Project: Social Information Processing in Autism Spectrum Disorder
Mentor: Suma Jacob, MD, PhD

Catherine Chan, MS
Campbell University
Project: The Impact of Personal Loss Bereavement on Medical Students During Medical School and the Efficacy of Web-Based Support Intervention
Mentor: Margaret L. Stuber, MD (University of California, Los Angeles)

Alexander Demand, BS
Oklahoma State University Center for Health Sciences
Project: Systematic Review of Outcomes in the Treatment of Childhood and Adolescent Posttraumatic Stress Disorder
Mentor: Keely Wheeler, DO
Nohemi Herrera, BS  
University of Illinois at Chicago  
Project: Symptoms Related to Prenatal Exposure to Alcohol and Substances Symptoms Masquerading as Attention-Deficit/Hyperactivity Disorder  
Mentor: Marilyn Griffin, MD  
Ms. Herrera’s award was partially supported by the Ruth and Peter Metz Family Foundation.

Morgan A. McCoy, BA  
Philadelphia College of Osteopathic Medicine  
Project: Assessment of Clinician’s Knowledge and Screening Practices of Non-Medical Stimulant Use in Patients With Attention-Deficit/Hyperactivity Disorder  
Mentor: Terri L. Randall, MD

Samantha Parkhurst, BS  
Indiana University  
Project: Improved Metabolic and Psychiatric Outcomes With Discontinuation of Atypical Antipsychotics in Youth Hospitalized in a State-Operated Facility  
Mentor: Leslie Hulvershorn, MD, MSc

Hilary K. Renaldy, BA, MDiv  
University of Illinois at Chicago  
Project: Effectiveness of a Modified Evidence-Based Parenting Program in a Disadvantaged Large Urban Setting  
Mentors: Jesse B. Klein, PhD  
Meghann Hennelly, MD

Allison Salk, BA  
Icahn School of Medicine at Mount Sinai  
Project: Phenotype of Term vs. Preterm Children in the Autism Treatment Network Database  
Mentor: Alexander Kolevzon, MD

Sarah L. Weatherall, BA  
The Warren Alpert Medical School of Brown University  
Project: Evaluating the Feasibility and Acceptability of the Track System: An Empirically Informed Intervention for Adolescent Psychiatric Inpatients  
Mentor: Jeffrey I. Hunt, MD

Rachel A. Zambrowicz, BA  
Columbia University  
Project: Does the TFEQ Restraint Scale Predict Eating Behavior in a Laboratory Meal?  
Mentor: Eve Khlyavich Freidl, MD
The NIDA-AACAP Resident Training Award in Substance Abuse and Addiction, supported by the National Institute on Drug Abuse (NIDA), offers up to $18,000 for one year for project support and $2,000 for mentor support. This award aims to encourage general and child and adolescent psychiatry residents to pursue careers in the field of child and adolescent substance abuse and/or addiction treatment.

This award is administered through AACAP’s Research, Training, and Education Department and the AACAP Substance Abuse and Addiction Committee, under the direction of Kevin M. Gray, MD, and Catherine A. Martin, MD.

Alejandro D. Meruelo, MD, PhD
University of California, San Diego
Project: Academic Achievement Based on Neuroimaging, Measures of Initiation of Cannabis Use, and Prior Performance: Improving Current Screening Practices
Mentor: Susan F. Tapert, PhD

Iman Parhami MD, MPH
Johns Hopkins University
Project: Screening, Brief Intervention, and Referral to Treatment (SBIRT) and Practice Patterns of Pediatricians: Results From a National Survey
Mentor: Michelle Horner, DO
Acknowledgements

The American Academy of Child and Adolescent Psychiatry expresses appreciation to the following individuals, funds, organizations, and companies that have contributed to AACAP’s 63rd Annual Meeting:
